welcome

Welcome to University Hospitals Geauga Medical Center

On behalf of each and every one of us at UH Geauga Medical Center, we welcome you to our hospital. We're all here for one reason: to do whatever we can to serve you and to ensure your well-being, comfort and total satisfaction. We are absolutely committed to care for you and your family with integrity, respect and sincere compassion.

This welcome guide is designed to help with information and answers about who will be caring for you, where to find what you need, what to expect and who to call. It's also a good place to keep other information you receive, notes about your treatment or questions you want to ask.

Please feel free to ask whenever you have a question. We believe patients and families are our true partners in creating the best care. In fact, you'll find a number of very specific ways a concerned family member can actively participate in improving your care here in the hospital and after you're discharged.

As Geauga County's full-service regional hospital, recognized by U.S. News and World Report for excellence in gastroenterology, orthopaedics and neurology, UH Geauga Medical Center brings all the state-of-the-art medical technology and expertise of University Hospitals closer to home for you, with a personal, human touch.

We thank you for choosing UH Geauga Medical Center and for placing your trust in us. It is our privilege to care for you and your family.

M. Steven Jones

President

Our Mission: To Heal. To Teach. To Discover.

About University Hospitals Geauga Medical Center

Recognized as the leading health care resource in Geauga County, University Hospitals Geauga Medical Center is a 226-bed, nonprofit acute care facility providing a full range of inpatient and outpatient services to residents of Geauga, Ashtabula, Cuyahoga, Lake, Portage and Trumbull counties. Focused on exceeding patient expectations in every facet of the patient experience, UH Geauga Medical Center provides quality care in more than 40 clinical specialties including:

- University Hospitals Harrington-McLaughlin Heart & Vascular Institute offers comprehensive, high-quality diagnosis and treatment of hypertension, congestive heart failure, cardiac arrhythmia, coronary heart disease, peripheral vascular disease and abdominal aortic aneurysm in a state-of-the-art facility, as well as immediate access to the most innovative treatment technologies and specialists in cardiovascular medicine and diagnostic imaging. UH Geauga Medical Center is an accredited Chest Pain Center.
- The Center for Women's Health includes 12 labor/delivery/recovery and five post-partum suites. These beautifully appointed suites offer the 24/7 backup of University Hospitals Rainbow Babies & Children's Hospital neonatologists, physicians and 24-hour OB house officer staff in a five-star hotel setting.
- University Hospitals Seidman Cancer Center, the only regional hospital based presence of this acclaimed center of excellence for cancer care, provides on-site screenings, diagnostic imaging, innovative clinical trials, comprehensive infusion therapies, nutrition and psychological support from a nationally recognized, multidisciplinary team of medical, surgical and radiation oncologists. UH Geauga Medical Center is an Accredited Breast Center.
- The Orthopaedic Center at UH Geauga Medical Center features advanced technologies for patients undergoing spine, knee, hip, foot, ankle, hand, elbow or shoulder surgery, from diagnostic imaging and patient education to total joint replacement and group physical therapy.
- University Hospitals Neurological Institute provides innovative, integrated and individualized care to patients with diseases affecting the nervous system. Headache, stroke, pain and other conditions related to the nervous system can sometimes evade precise diagnosis and treatment, but UH Geauga Medical Center brings a new level of sophistication to deal with these problems. Leading experts in neurology, neurosurgery and other specialties collaborate to devise customized care plans using the latest clinical advances and technologies. UH Geauga Medical Center is a stroke-accredited facility.
- The Digestive Health Institute/Bariatric Surgery & Nutrition Center offers minimally invasive gastric bypass and gastric band procedures, as well as programs to help patients reach and maintain their ideal weight while reducing risk for cancer, high blood pressure and diabetes. Our expert medical and surgical teams collaborate to provide comprehensive, compassionate care for patients with disorders of the digestive system, from preventive colonoscopy and EGD screenings to diagnoses and advanced treatments.
- Geriatric Services & Senior Adult Assessment Program which, as a NICHE-designated hospital, revolutionizes the care of seniors within the hospital and throughout the region.
- Behavioral Health Services provides individualized, innovative psychiatric treatment for adults, including geriatric patients.
- University Hospitals Urology Institute, where men and women of every age can now experience the full range of urological care. Specializing in advanced minimally invasive and noninvasive techniques as well as the development of personalized treatment plans for adults with voiding dysfunction and urology-related conditions.

Advanced surgical facilities offer minimally invasive and interventional procedures and other therapies to shorten hospital stays. UH Geauga Medical Center also provides a link to other University Hospitals outpatient health centers and access to advanced care services at University Hospitals Case Medical Center.

OUR SERVICES

Partners in Care

A good relationship between caregivers, patients and their families is an essential part of superior care. At UH Geauga Medical Center, *relationship-based care* helps us focus on your unique and personal needs, priorities and concerns. Everyone here – nurses, doctors, housekeepers, nutrition services personnel, transporters, social workers, therapists and many others – will strive to work with you and your family as partners in care.

To ensure a personalized and trusting relationship develops right from the start of your hospital stay, your RN coordinator (also called your *relationship nurse*) will conduct a personal orientation with you when you are admitted to get to know you and help you understand what's to come. Your nurse will continue to meet with you and/or family members each day during your stay, to help you understand your schedule for the day, interpret the results of tests and treatments, discuss your concerns, and work with you and your family toward the best possible hospital experience.

That includes helping you get ready to go home. Your nurse-led team will coordinate plans for your care

after hospitalization. During a discharge interview, you will be guided through the discharge process and again, any concerns will be addressed and questions answered. Once you are home, we will give you a follow-up call.

These conversations are your chance to let us know your thoughts and express your concerns. The discussions are our chance to listen, to get to know you and to understand how we can best meet your needs.

The Daily Health Care Journal (provided separately from this guide) is a great place for you to keep track of information, instructions and questions for your caregivers.

Relationship-based nursing is at the center of the healing environment at UH Geauga Medical Center. We are here to make sure the personal care you receive is as superb as the medical care you receive; that you are always treated as an individual with dignity, guided and well-informed throughout your stay; and made as comfortable as possible and well-prepared to return home.

Your Team

Health Care Professionals

As a patient at UH Geauga Medical Center, you will benefit from the experience and expertise of a team of health care professionals, working together to coordinate your individualized care.

Physicians

Attending physician: A member of UH Geauga Medical Center's medical staff with ultimate responsibility for your care during your stay. Usually, the physician who admitted you to the hospital.

Consulting physician: A physician or specialist called upon by the attending physician to assist in your diagnosis and/or treatment.

Hospitalist: Hospitalists are on-site, board-certified or board-eligible physicians who specialize in caring for patients over the age of 16 during their hospital stay.

Intensivist (ICU): A physician specially trained in the care of critically ill patients.

Resident: A medical school graduate who is training in a medical specialty.

House Physician: A physician employed by UH Geauga Medical Center, who is available to provide timely patient care, supplementary care and special clinical services under the direction of the attending physician.

Physician Assistant: A physician assistant is a licensed health care professional with advanced training, who practices medicine under the direct supervision of an attending physician, and provides a broad range of diagnostic and therapeutic services.

Nurses

At UH Geauga Medical Center, nurses are our frontline and the backbone of our staff. They constantly monitor the status of our patients and assure their well-being. Your nursing team may include:

Nurse manager: A highly experienced registered nurse who is the supervisor of a hospital unit or patient floor.

RN coordinator: The personal advocate for you and your family who coordinates care, communication and discharge planning. The RN coordinator may be a different person on different days, but your individual information will be coordinated so you receive consistent personal care throughout your stay.

Registered nurse (RN): RNs are responsible for your care at all times. The RN assists physicians during treatments, administers medications, helps coordinate the efforts of the health care team, advocates for and educates patients and families.

Nurse practitioner/clinical nurse specialist (NP/CNS): NP/CNS are advanced practice registered nurses (APRN) with graduate-level education and training in a specific area of health care such as wound care, family health, emotional support, pain control, etc.

Licensed practical nurse (LPN): LPNs assist patients and families in a variety of ways as part of the nursing team, under the direction of RNs.

Nursing assistant: Assistants provide valuable additional support, including assistance with bathing, feeding and toileting.

Other Care Providers

Secretary: The unit secretary is the “first responder” if you use the call light or if people phone the nursing station on your floor.

Occupational therapist: These health care professionals help patients learn to accomplish activities of daily living, such as dressing, bathing and cooking.

Physical therapist: Physical therapists help patients build their strength, improve function and move independently.

Speech therapist: Speech therapists help patients regain the ability to speak clearly and communicate effectively.

Respiratory therapist: These therapists help patients manage and/or overcome moderate to severe breathing problems to regain independence and enhance quality of life.

Care coordinator/medical social worker: Care coordinators and social workers coordinate with your entire health care team to develop your plan for care

after you leave the hospital: helping families adjust to illness, arranging needed services at home (including companionship), arranging transfer for rehabilitation, accessing useful community resources, and providing support (depending on your individual needs).

Care Coordination/Medical Social Work: 6263, or 440-285-6263 from outside the hospital

Patient experience coordinator: The patient experience coordinator is an additional point of contact to assist you and your family with concerns, expedite services and provide emotional support. They can help with various issues, including communication, policies and procedures, quality of care, safety, lost items, and even general information about the hospital and our communities. If you encounter a problem, we encourage you to talk directly with your care provider first. If you are still not satisfied, or if you prefer to discuss your concern with a third party, please contact the patient experience coordinator.

Patient Experience Coordinator: 6624, or 440-285-6624 from outside the hospital

Patient advocate: The patient advocate is yet another resource for patients and families, to help navigate the complex issues that can arise with hospitalization. The patient advocate is available to assist with ethics questions, financial/insurance issues, and to advocate for the patient in the event of a grievance.

Patient Advocate: 6372, or 440-285-6372 from outside the hospital

Environmental services (housekeeping): We recognize that the cleanliness of your room and of the entire hospital is essential to the highest quality care. Our housekeeping teams are dedicated to keeping your room clean and sanitary and are available 24 hours a day, seven days a week. Please let us know if you are in need of housekeeping services.

Environmental Services: 6491, or 440-285-6491 from outside the hospital

Transporters: Transporters are nonclinical employees responsible for taking patients to and from their rooms to specific tests, procedures and departments within UH Geauga Medical Center.

Volunteers: Nearly 2,000 people volunteer their time at UH facilities throughout Northeast Ohio to help our patients with a variety of needs. At UH Geauga Medical Center, for example, our information desk staff includes volunteers, available to provide directions and answer questions.

Other Services

Spiritual Support

Your minister, priest or rabbi is welcome to visit you in the hospital. Spiritual books, including Bibles, are available upon request. A nondenominational chapel is located on the first floor just off the lobby and open 24 hours, seven days a week.

If you would like a chaplain to visit, pastoral care services are available from 8 a.m. – 4:30 p.m. A listing of area churches and religious establishments that may be contacted for you is also available.

Pastoral Care Services: 6271, or 0 for the hospital operator after hours

Translation and Sign Language Services

We offer real-time audio and video interpreter services for over 150 different languages, including American Sign Language for non-English speaking and hearing-impaired patients 24 hours a day, seven days a week through a program known as My Accessible Real-Time Trusted Interpreter (MARTTI). MARTTI allows patients and families to hear, see and talk to an interpreter live via a wireless computer connection. These services can be requested through your nurse.

Please Speak Up™!

University Hospitals is a firm supporter of the Speak Up program, a national patient safety campaign developed by The Joint Commission* and the Centers for Medicare & Medicaid Services. Speak Up urges patients to help prevent health care errors by becoming active, involved and informed participants on their health care team. If you or your family has a safety concern, please speak up. We welcome you as a partner on our safety team. The Speak Up program – and UH – encourages patients to:

Speak up if you have questions or concerns. If you still don't understand, ask again. It's your body and you have a right to know.

Pay attention to the care you get. Always make sure you're getting the right treatments and medicines by the right health care professionals. Don't assume anything.

Educate yourself about your illness. Learn about the medical tests you get and your treatment plan.

Ask a trusted family member or friend to be your advocate, advisor or supporter.

Know what medicines you take and why you take them. Medicine errors are the most common health care mistakes.

Use a hospital, clinic, surgery center or other type of health care organization that has been carefully checked out. For example, The Joint Commission visits hospitals to see if they are meeting The Joint Commission's quality standards.

Participate in all decisions about your treatment. You are the center of the health care team.

UH encourages all of our patients to discuss their care and hospital services with nurses and physicians, and to ask any questions you may have. Space is provided in the back of this guide where you can write down your questions and important information. We encourage you to do so!

For families and visitors: If you notice a change in condition or you think that something doesn't seem right with your loved one, please notify his/her nurse immediately. Our Rapid Response teams can be mobilized immediately to help. Information about Rapid Response teams is posted on each floor, and we encourage you to familiarize yourself with this information.

*The Joint Commission – an independent, not-for-profit organization – is the nation's oldest and largest standards-setting and accrediting body in health care.

What Your Day Will Be Like

The staff of UH Geauga Medical Center is dedicated to making your hospital stay as comfortable as possible, from the time you are admitted until you are discharged. The daily routine varies for each patient, of course, depending on what brings you to the hospital. But in general, you can count on:

Medical Rounds

Once each day, your doctor will meet with you to assess your health, report information, make plans and answer your questions.

RN Coordinator Visits

Once each weekday, your RN coordinator will stop by to discuss your progress and answer questions. Family members are encouraged to participate in these discussions as *partners in care*.

Patient Experience Coordinator Visits

Once each day, the patient experience coordinator will visit to make certain that your stay at UH Geauga Medical Center is exceeding your expectations, answer questions and address any concerns you may have.

Patient Care Rounds

Usually once each hour, a nurse or assistant will come into your room to check on you, take vital signs, inquire about your pain, offer assistance, etc.

Atmosphere of Healing

At UH Geauga Medical Center, we are focused on promoting a quiet, restful sleep environment throughout the night. Each evening, “quiet time” will begin at 10 p.m. Lights in the corridors will be dimmed, and your door may be closed at your request. Ear plugs are available from your nurse. Some noises – such as cardiac monitors, IV pumps, call lights and other equipment – are unavoidable in a hospital, but our nurses will make every effort to keep such noises to a minimum. If you are disturbed, please let your nurse know so the situation can be addressed.

If you are in a double room, we ask that you be considerate of the needs for rest, quiet and privacy of your roommate.

Your Room

When you arrive in your room, your nurse will explain everything you'll need to know to be as safe and comfortable as possible: how to operate the bed controls, call light and TV remote; how to use the bathroom and how to get help when you need it. Please don't hesitate to ask any questions you may have.

Communication Board

Your room includes a Communication Board visible from your bed. Each day, your nursing team will make sure it includes up-to-date information, including the names of your caregivers, messages, important numbers, a care checklist and more.

Skylight TV Service

Our Skylight access interactive television system is a free service that allows you to watch cable television and movies on demand, play games and access the Internet, all on the television in your room. The system also provides important patient health education and information about the hospital. Use the Skylight remote control attached to your bed to navigate the system. For instructions and a channel directory, please refer to the guide on your nightstand. To access the Internet, ask your nurse for a wireless keyboard.

Telephone Service

Patients have complimentary in-room telephone service with unlimited local calls. Your in-room telephone includes a volume control on the handset.

To call outside the hospital:

Local calls – Dial 9, then the number

Long-distance calls – Dial 0 and the operator will assist you. You will be asked if you want to call collect, charge to your home phone or use a prepaid calling card.

If you have questions, please ask your nurse.

(You will be charged for making long-distance calls.)

To call within the hospital:

Dial the four-digit phone number (for example, 6000)

Internet Access/Wi-Fi

UH Geauga Medical Center is pleased to provide free wireless high-speed Internet access for our patients and guests. To connect, please follow these steps:

1. Turn on your laptop or other Wi-Fi device with wireless enabled
2. Connect to the wireless network "UH_Guest"
3. Launch your web browser and go to the website UHhospitals.org
4. If you do not see the UH welcome page, you may need to configure the SSID or network name to "UH_Guest"

For technical support, please call 1-888-304-9131.

(Dial 0 and the operator will assist you with this call.)

Limited Internet access is also available via the Skylight television system. To use it, just ask your nurse for a wireless keyboard.

Cell Phones

Cell phones may be used throughout the hospital. Please respect the privacy and dignity of others.

Your Meals

At-Your-Request Room Service

Our At-Your-Request Room Service program allows you to choose what you wish to eat, when you wish to eat it (with your doctor's okay, of course). It's simple and works like this:

1. Place your meal order with our Nutrition Services Department any time between 7 a.m. and 6:30 p.m. (Please let us know if you have any food allergies.) Your order will be verified for special diet restrictions and prepared according to your order.
2. Your meal will be delivered within 45 minutes. If you need help setting up your bedside table, opening containers or dining, just ask the Nutrition Services assistant who delivers your meal.
3. Meals can be ordered in advance. Just call the room service operator and let us know when you would like your order delivered.

Kosher and gluten-free menus are available too – just ask your nurse or Nutrition Services assistant.

Families are welcome to bring favorite foods from home, which may be stored in a refrigerator on your floor. Please remember to check first with your nurse about dietary restrictions. Always label the food with the patient's name and date.

At-Your-Request Room Service: 6500, or 440-285-6500 from outside the hospital

Guest Trays

Visitors who would like to order a room service meal and eat with a patient can prepurchase a meal in the Café. The visitor simply asks the cashier for a \$5 guest tray ticket and pays by cash or credit card. Be sure to save the receipt! The visitor can then order through the At-Your-Request Room Service line, just as a patient would. When meals are delivered, the receipt is exchanged for the guest tray.

Clinical Nutrition Services

Registered dietitians are available to help patients plan their diets and answer questions about their nutritional needs. Your nurse can contact Nutrition Services on your behalf.

YOUR SAFETY *is paramount*

Protective Services

The Department of Protective Services helps ensure a safe and secure environment for patients, visitors, staff and employees. Security officers patrol all UH Geauga Medical Center buildings and grounds 24 hours a day, seven days a week, and are available 24/7 in emergencies.

Protective Services: Dial 0 and ask for Protective Services, or 440-285-6267 from outside the hospital

Patient Safety

Hospitals across the country are working to make health care safe, and patients and their families play a vital role in the process. Your role is to be an active, involved and informed member of your own health care team...a partner in your own care.

Expect to participate in all decisions about your care. Ask questions about your medications, treatments, tests and other aspects of your care. We welcome you as a partner on our safety team! (Information on the Speak Up™ safety program, page 7.)

Identification

Employees: All employees must wear their hospital photo identification at all times. If you need assistance, just look for any employee with an ID badge, and they will be able to assist you.

Patients: Before every procedure or test is performed or medication given, a staff member should check your identification. Feel free to remind staff members to confirm your identity. Let them know if you are concerned about receiving the wrong medication, treatment or test.

Valuables and Belongings

UH Geauga Medical Center is not responsible for lost personal belongings. This includes dentures, glasses, jewelry, cash, clothing, laptop computers or other items. We strongly recommend that you leave any valuables at home or send them home with a family

member. If necessary, hospital security can secure some small items during your stay. Reading materials, puzzles and craft items are important for your comfort, of course, and can be kept on the bedside table.

Medical equipment and medications you were using prior to admission should be sent home. Everything you need will be provided while you are here.

Keep hearing aids, eyeglasses and dentures in appropriate containers when not in use, and place personal clothing items in drawers or closets, which are not locked. We also suggest that you write your name on your personal items, or ask your nurse for assistance with this. Do not wrap dentures, partials, jewelry or hearing aids in tissue where they may accidentally be thrown away.

Your family may want to take home the clothing you arrived in, and bring back a fresh change of clothing for your return home.

Please check your room carefully before changing rooms or going home to ensure that you have all of your personal belongings.

Smoking Policy

Smoking is prohibited in all UH buildings and property. Anyone observed smoking on UH property will be approached with courtesy and informed of the UH Smoking Policy.

Infection Control

Preventing the spread of infection is extremely important to all of us. You may see workers wearing gowns, gloves or face protection while performing certain procedures. Standard precautions like these are practiced when contact with body fluids is likely, in order to protect all patients admitted to UH Geauga Medical Center. Additional precautions may be necessary for some conditions, and a door sign with instructions about protective apparel may be posted.

Hand hygiene is very important in preventing the spread of infection. Do not hesitate to ask any caregiver – whether a hospital employee or family member – to wash or sanitize their hands before caring for you.

Hospital workers are required to wash their hands with soap and water or use alcohol sanitizer before and after caring for each patient. We suggest that visitors also wash or sanitize their hands when entering and leaving your room.

Frequently Asked Questions About MDROs

What are multi-drug resistant organisms (MDROs)?

Multi-drug resistant organisms are germs that have become stronger than the normal antibiotics used for treatment. Common antibiotic-resistant organisms are:

- MRSA – Methicillin-resistant staphylococcus
- VRE – Vancomycin-resistant enterococcus

Other germs that can become highly resistant are acinetobacter, klebsiella, pseudomonas and serratia.

Who gets MDROs?

People who have been very sick, are elderly, those with weak immune systems or those who have had many antibiotics are more likely to get MDROs. It can also occur in people who have been in the hospital for a long time or those who have contact with the health care system, such as going to doctors' offices or being in a nursing home or extended-care facility. People with chronic illnesses, such as kidney disease, diabetes, peripheral vascular disease or certain skin conditions may get these infections. Dialysis patients, those with central lines or urinary drainage tubes are also prone to getting infections with these organisms.

Where are MDROs found?

MDROs can infect any part of the body: urine, blood, sputum, stool, skin, surgical wounds or any other body site. Infection can start in one place and be carried by the bloodstream to another part of the body. Some of these germs are also found in soil, water and on hard surfaces around us.

What's the difference between colonization and infection?

People may be "colonized" with the germ, which means that they have the germ, but it is not making them sick. Other people may be "infected," which means they have the germ, and it is making them sick. Signs of infection include fever, pain, tenderness, redness, pus and swelling.

How are these infections treated?

Antibiotics can be prescribed to treat infection. Sometimes, there are only one or two antibiotics that can be used. It may take weeks to get rid of the infection. If the patient is colonized, he/she may not be treated.

Can MDROs be spread?

Yes. Patients with MDROs are placed on precautions while in the hospital. The type of precautions used are based on where the infection is located. Patients with infections or colonization of urine, blood, wounds or skin will be placed on "Contact Precautions." Those with the germ in sputum will be placed on "Droplet Precautions." Sometimes, both types of precautions may be used.

1. Hospital staff:

- Will wear gloves, gowns and/or masks when giving direct care or cleaning your room.
- Will wear gloves and/or gowns when doing procedures outside of your room.
- Wash their hands or use hand sanitizer before leaving your room.

2. Visitors:

- Should wear gloves, gowns and/or masks as directed by signage outside the patient's room. They do not need to use gloves or gowns if they are just sitting in your room.
- Must wash their hands or use hand sanitizer before leaving your room.

3. You:

- Must wash your hands or use alcohol sanitizer before leaving your room for a walk. Put on a clean gown and/or bathrobe.
- Must be able to control your bowel movements and bladder.
- Must have drainage tubes attached to a bag or covered with a dressing.
- Have to wear a mask outside of your room if on Droplet Precautions.

4. Your room:

- Any instruments used in your room or equipment used to transport you will be cleaned with a disinfectant.

MDROs are very persistent germs. They often can survive on hard surfaces for up to two weeks and on hands for hours. Killing the germ can be done with the proper use of disinfectants and good hand hygiene.

VISITORS *are very important*

It is your right to have support persons* come to visit you while you are in the hospital. We welcome and encourage frequent visits by family, friends and the people who will support you during your stay.

Visiting Hours

We try to be as flexible as possible to meet your and your support persons' needs. However, please know that under certain circumstances, it may be necessary to limit visitation. (For example, to control the spread of infection, or to ensure a quiet, restful atmosphere for a patient or patient's roommate.) The attending physician, nurse manager or nursing supervisor may adjust/restrict the number of visiting hours and/or relatives and friends in any unit as deemed necessary and appropriate. You are entitled to an explanation whenever a restriction is placed on visitation.

**A support person can be a spouse, family member, same-sex partner, friend or other individual who supports the patient during his/her hospital stay. There is no limit on who may be designated a support person by the patient and no restrictions based on race, color, national origin, religion, sex, gender identity, sexual orientation or disability.*

General UH Visitation Guidelines

- Visiting hours are 10 a.m. – 8 p.m. unless otherwise noted.
- Please limit the number of support persons (visitors) at any one time. Our suggestion is two per patient.
- Please don't visit if you are sick or might have a cold or other illness.
- Keep voices low and respect the privacy and dignity of other patients and their visitors.
- If a sign outside the patient's room shows special precautions, please follow the directions or ask a nurse for help.

Medical Surgical Units

Open visitation during visiting hours is welcomed as patient condition and unit activity allows.

Intensive Care Unit (ICU)

Visitors must be immediate family members or a person designated by the patient. Children under the age of 13 are not permitted. Our visiting guidelines for the ICU are designed to allow visitation while giving each patient the best possible chance of overcoming serious illness. Visitors should use the phone outside the ICU entrance to check with the nurse prior to visiting.

Center for Women's Health

Support persons may visit at any time. Open visitation during visiting hours is welcomed as patient condition and unit activity allows. To protect our newborns, no visitors should come to the floor if they have any symptoms of illness.

Behavioral Health Unit

1 – 2:30 p.m. and 6 – 7:30 p.m. (Visitors must be 16 years of age or older.)

Because behavioral health care features unique and often personal elements, the unit has special visiting procedures designed to enhance care and protect patient confidentiality. Upon admission, patients are assigned a personal identification number (PIN) that may be given to family and friends. Visitors must have this PIN in order to visit or contact the patient by phone.

All items brought by visitors must be examined by the nursing staff before being given to the patient. Also, patients who have been discharged are not permitted to visit other patients on the unit. Please check with the nurse for additional considerations.

Patient Information

For information such as directions around the hospital, a telephone number to a patient's room or help getting in touch with a nurse manager, please contact Patient Information or stop by the information desk in the main lobby.

Patient Information: Dial 0, or 440-285-6239 from outside the hospital

Directions

UH Geauga Medical Center is located 5.6 miles south of Chardon, off Ohio Route 44 (Ravenna Road) in beautiful Geauga County. Simple access is available from I-90 as well as the Ohio Turnpike via Route 44.

From the North

Take I-90 to the Route 44 S exit. Follow Route 44 S, through Chardon, to the hospital entrance drive (Ravenwood Drive), which will be on the left.

From the East

From Route 87 (Kinsman Road) or Route 422 (Main Market Road), turn right (north) onto Route 44 (Ravenna Road). Follow Route 44 to the hospital entrance drive, which will be on the right.

From Route 322 (Mayfield Road), turn left (south) onto Route 44 (Ravenna Road). Follow Route 44 to the hospital entrance drive (Ravenwood Drive), which will be on the left.

From the South (and Ohio Turnpike/I-80)

Follow Route 44 N (Ravenna Road) to the hospital entrance drive (Ravenwood Drive), which will be on the right.

From the West

From Route 87 (Kinsman Road) or Route 422 (freeway extension), turn left (north) onto Route 44 (Ravenna Road). Follow Route 44 to the hospital entrance drive (Ravenwood Drive), which will be on the right.

From Route 322 (Mayfield Road), turn right (south) onto Route 44 (Ravenna Road). Follow Route 44 to the hospital entrance drive (Ravenwood Drive), which will be on the left.

Parking

Public Parking

Convenient, free hospital parking is available directly in front of the hospital main entrance, off the hospital entrance drive (Ravenwood Drive).

Additional parking is also available on the west side of the hospital, adjacent to the Emergency Department entrance, and on the south side of the hospital, adjacent to the Conference Center.

Valet Parking

Valet parking is available at the main entrance 8:30 a.m. – 3 p.m. Monday – Friday (no holidays).

Designated Parking

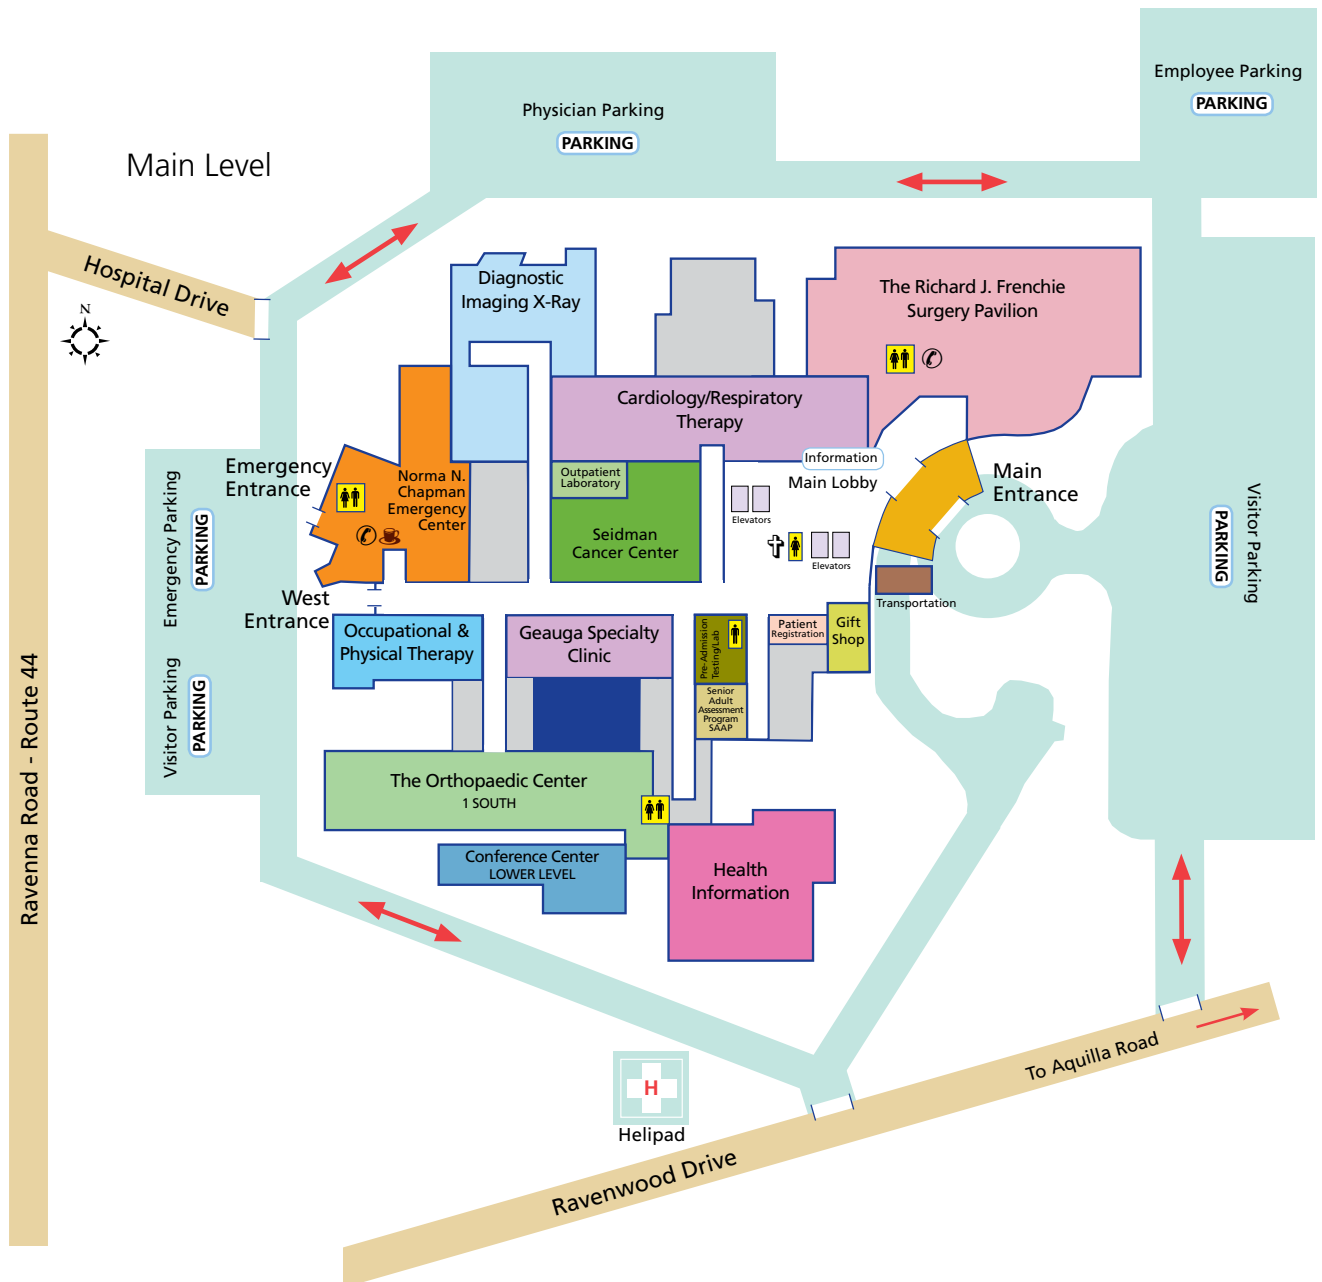

Handicapped parking is clearly designated in all parking areas. Separate handicapped parking spaces are conveniently located adjacent to all hospital entrances.

Wheelchair Access

UH Geauga Medical Center has all wheelchair-accessible hospital entrances. Wheelchairs are available at all hospital entrances if needed.

going HOME

Please contact your nurse if you have special concerns related to the day of discharge. Most patients can anticipate an 11 a.m. discharge time. A staff member will escort you to the appropriate doors upon your discharge.

Although you look forward to going home, the transition from hospital to home can be stressful for you and your family. Our medical team will discuss your discharge plan with you and your family as far in advance as possible to ensure a smooth transition. Please raise any concerns you have as early in the process as possible.

Discharge Information

Transportation

If you need transportation, please let us know as soon as possible. A staff member will be happy to assist you with transportation arrangements at the time of discharge. Please note that there may be a cost involved when transportation home is provided by an ambulance service. This may not be a covered service by your insurance provider.

Transportation is also available within Geauga County through Geauga County Transit.

Transportation (Care Coordination/Medical Social Work): 6263, or 440-285-6263 from outside the hospital

Discharge Medications

As we are not permitted to provide you with home-going medications, any prescriptions for discharge medications must be taken to a drugstore or pharmacy to be filled.

We recommend that you always carry a list of the medications you are taking and their doses.

Care Coordination

You may receive a visit from a care coordinator or social worker soon after your admission, so they can begin planning for your needs after you leave the hospital. They will assist you with a variety of services including home health care, durable medical equipment, transfer to other care facilities and any other discharge needs you may have.

Care Coordination/Medical Social Worker: 6263, or 440-285-6263 from outside the hospital

Satisfaction Surveys

You may receive a survey after returning home from the hospital. We ask that you please take a few minutes to

complete any post-discharge survey that you receive. If at any time during your stay you do not feel we are meeting your expectations, we strongly encourage you to speak up so we can resolve the issue immediately.

Medical Records

Health Information Services provides copies of information contained in patients' medical records. Records are not available until all physicians have completed your records and all processing is complete. You or your legal representative will be asked to complete a request form. Once records are available, requests generally take about 10 working days to be filled. A fee is charged for certain copying services.

Health Information Services: 6373, or 440-285-6373 from outside the hospital

Electronic Medical Record (EMR)

EMR is a computerized, real-time medical chart that enhances patient care and safety by providing one central source of accurate health information accessible by all of the physicians, nurses and other health professionals caring for a patient.

Patient and Family Education

Patient and family education is a shared responsibility between patients, families and caregivers. UH Geauga Medical Center is committed to helping patients and families with health care goals. Information is available to help you understand disease processes and treatment options, as well as to help you adjust to lifestyle changes. Nurses and our nurse educators can help answer your questions about healthy lifestyles, activities of daily living and preventive self-care. Please talk with your nurse about any disease management education or discharge-planning assistance.

Care Options After Discharge

Rehabilitation Services

UH Geauga Medical Center is home to a wide range of outpatient services to help you regain strength and mobility, relearn activities of daily living and improve quality of life following a hospital stay. These include:

- Physical, occupational and speech therapies
- Hand and upper extremities therapy
- Cardiac and pulmonary rehabilitation
- Stroke rehabilitation
- Anticoagulation Therapy Clinic
- Lymphadema Center

Rehabilitation Services: 6358, or 440-285-6263 from outside the hospital

University Hospitals Home Care

University Hospitals Home Care offers a comprehensive array of services, including skilled nursing, home IV therapy and specialty injections, rehabilitation services, pediatric care, women's health and nonmedical assistance for patients when they are home. UH Home Care staff provides the same high-quality, compassionate care you are accustomed to receiving from UH hospitals, outpatient centers and physicians.

Other home care options are also available.

University Hospitals Home Care: 216-844-4663 or 1-800-552-8442

Follow-Up Appointments

To schedule appointments when you're home:

- Call your physician's office
- Visit UHGeauga.org
- Call 1-866-UH4-CARE (1-866-844-2273)

You Can Help

Giving to UH Geauga Medical Center

To support regional wellness and deliver superior patient-centered care, we rely on the support of our communities. Donations and other philanthropic support will make a difference to the many patients who come to UH Geauga Medical Center for their care. If you would like to give to UH Geauga Medical Center, please contact the UH Institutional Relations & Development Department at 440-285-6595, visit UHGiving.org, or use the contact information below:

University Hospitals Geauga Medical Center
P.O. Box 74214, Cleveland, OH 44101-9888
440-285-6595 | Fax: 440-286-7219

Support Programs

UH Seidman Cancer Center Support Groups

UH Seidman Cancer Center at UH Geauga Medical Center offers many support groups that can be invaluable for both patients and families after discharge. All programs are free. Groups include:

- Bouncing Back (for blood and marrow transplant patients)
- Celebration of Life (for survivors of oral, head and neck cancer)
- Everyday Miracles (for women with advanced breast cancer)
- Hope for Tomorrow (for women with gynecological cancer)
- Life after Whipple Surgery
- Living Daily: Coping with a Brain Tumor
- Minority Women with Breast Cancer Uniting

Your doctor, nurse or social worker can provide more information. Please call for specific information on meetings available, dates and times.

UH Seidman Cancer Center: 6310, or 440-285-6310 from outside the hospital

Healing & Hope

Healing & Hope is a quarterly brochure that lists free education and support programs at UH Seidman Cancer Center sites across Northeast Ohio. To learn more, visit UHhospitals.org, click on the UH Seidman Cancer Center link, and then click on the "Outreach and Events" button.

Affiliated Support Programs

Support for patients after discharge is available for a wide variety of conditions, including:

- Stroke Support Group
- Diabetes Support Group
- Ostomy Support Group
- Cancer Support Group
- Bariatrics Support Group
- Coumadin® Support Group

For information about these and other community support groups, please ask your physician, nurse or social worker.

Financial Information

Finances

You will receive separate bills from the hospital and from your physician(s).

Hospital Bills

The hospital bill includes charges for your room, equipment, supplies, diagnostic and therapeutic testing, operating room time, etc. Your insurance company will be billed directly, and a copy of the bill will be sent to you. Depending on your insurance plan, you will be responsible for paying certain expenses directly. These expenses include deductibles, co-insurance and non-covered charges.

Hospital Billing Questions

If you have questions concerning your hospital bill, please contact the financial counselor, located on the main floor.

8 a.m. – 4:30 p.m. Monday – Friday

Financial Counselor: 6259, or 440-285-6259 from outside the hospital

Physician Bills

You may receive bills for professional charges from various departments associated with UH Geauga Medical Center for diagnostic testing or specialty services. These professional services may include the reading/interpretation of X-rays, EKGs, laboratory tests and specialized services such as anesthesiology, neurology, orthopaedics, etc. You also will receive bills from doctors for professional charges. If you have any questions concerning your physician bills, please call the telephone number listed on each bill.

Financial Assistance Program

University Hospitals is committed to serving all patients regardless of their financial status or ability to pay. Through our Uninsured Charity Assistance Program, UH provides discounts on hospital bills for Ohio residents who do not have health insurance and who meet certain criteria. The amount of the discount is based on the patient's or family's income and Federal Poverty Guidelines. If you need more information or help with applications for financial assistance, please contact the financial counselor.

Financial Counselor: 6259, or 440-285-6259 from outside the hospital

Volunteer Services

Volunteers at UH Geauga Medical Center will have the opportunity to work directly with families, staff and our communities. Our Volunteer Services staff specializes in creating a personal volunteer experience that capitalizes on an individual's unique skills, abilities and desire to make a difference.

If you are interested in volunteering at UH Geauga Medical Center, visit UHGeauga.org and click on the "Outreach and Events" button, or simply call 440-285-6271. A volunteer services representative will contact you to discuss how we can help create your personal volunteer experience. As part of this process, you will have an opportunity to complete a volunteer application, meet with the volunteer services staff, attend an orientation, and participate in health and safety screenings.

Volunteer Services: 6271, or 440-285-6271 from outside the hospital

patient RIGHTS

Advance Care Planning

Sharing Your Wishes and Making Health Care Decisions

Do you know what health care treatments you would and would not want if you could not speak for yourself? Do your family and loved ones know what your wishes are? Do you have an advance directive?

Advance directives are legal documents that provide direction and instruction for your future health care in the event you are unable to make decisions for yourself. There are two types of advance directives, commonly referred to as a *Living Will* and a *Durable Power of Attorney for Health Care*.

- A *Living Will* is a written statement that makes clear the end-of-life treatments you wish. The purpose of a *Living Will* is to guide family members and physicians in deciding the use and continuation or withholding/withdrawal of life-sustaining treatment when your condition is terminal.
- A *Durable Power of Attorney for Health Care* is a written document that appoints and designates an individual to make health care decisions on your behalf when you are unable to do so for yourself. A *Durable Power of Attorney for Health Care* is not limited to end-of-life decisions. (Note: A *Durable Power of Attorney for Health Care* is not the same as a *Durable Power of Attorney*, which appoints and designates an individual to make financial decisions on your behalf when you are unable to do so for yourself.)

UH Geauga Medical Center honors treatment decisions outlined in valid advance directives and recognizes the rights of patients to choose and refuse treatment.

UH Geauga Medical Center supports the rights of its patients to make advance directives and strongly encourages its patients to plan ahead and prepare advance directive documents.

- Plan ahead so you can receive the care that is important to you and in accordance with your wishes.
- Plan ahead so that your family and loved ones understand your wishes for care when you can no longer make those decisions for yourself.
- Plan ahead to give you and your loved ones peace of mind.

UH Geauga Medical Center has prepared advance directive care planning materials for patients. If you need assistance in dealing with difficult issues regarding advance directives, our ethics consultation service can help.

For more information or to request copies of documents, please contact Care Coordination.

Care Coordination: 6263, or 440-285-6263 from outside the hospital

Patient Privacy

At UH Geauga Medical Center all patient information is confidential. We carefully follow the Health Insurance Portability and Accountability Act (HIPAA), which requires hospitals to:

- Ensure the confidentiality, integrity and availability of all electronic protected health information (EPHI) the covered entity creates, receives, maintains or transmits;
- Protect against any reasonably anticipated threats or hazards to the security or integrity of such information;
- Protect against any reasonably anticipated uses or disclosures of such information that are not permitted or required by the Privacy Rule; and
- Ensure compliance by its workforce.

For more information, speak with your nurse or call our patient experience coordinator at 6624, or 440-285-6624 from outside the hospital.

Each patient has the right to:

- Considerate and respectful care. This includes the right to be free from all forms of harassment, neglect, exploitation; and verbal, mental, physical and sexual abuse.
- Reasonable access to care.
- Effective communication in a manner he/she understands.
- Know the identity and professional status and the role of those caring for him/her.
- Impartial access to treatment regardless of race, religion, sex, ethnicity, age, sexual orientation or handicap.
- Receive assistance with physical disabilities and limitations, including assistance in communication for patients with vision, speech, hearing or cognitive impairments.
- Be fully informed in advance of furnishing or discontinuing care or treatment whenever possible.
- Have his/her spiritual and pastoral needs accommodated; and his/her cultural and personal values, beliefs and preferences respected.
- Know the reason for any transfer within or outside the hospital.
- Make informed decisions regarding his/her care and treatment, be informed of his/her health status, and be involved in care planning and treatment in terms the patient can understand.
- Refuse care and receive information on possible consequences of this refusal.
- Expect that all communications and records pertaining to his/her care will be treated as confidential by the hospital, except in cases such as suspected abuse and public health hazards when reporting is permitted or required by law.
- Access information contained in his/her clinical records within a reasonable time frame.

Patient Rights and Responsibilities

UH Geauga Medical Center recognizes that all patients have basic individual rights and responsibilities; and, as such, will endeavor to support and respect the basic human dignity of each patient as well as the civil, constitutional and statutory rights of each patient. UH Geauga Medical Center respects the patient's rights to participate in decisions about his/her care, treatment, and services, and to give or withhold informed consent. The patient or designated surrogate may exercise his/her rights without fear of coercion, discrimination or retaliation. A designated surrogate or proxy decision maker can exercise these rights on the patient's behalf if the patient lacks decision-making capacity, is legally incompetent or is a minor.

- Be informed of hospital policies and practices that relate to patient care, treatment and responsibilities; and to be informed of the hospital's charges for services and available payment methods.
- Be fully informed of and to consent or refuse to participate in any unusual, experimental or research project without compromising his/her access to the facility services.
- Receive care in a safe setting.
- Communicate with people outside of the hospital; restrictions are made with the patient's (or family, if appropriate) participation.
- Decline services by students.
- Personal privacy.
- Access assistance in domestic violence situations.
- Know the relationship(s) of the hospital to other persons or organizations participating in the provision of his/her care.
- Be free from restraints of any form that are not medically necessary or are used as a means of coercion, convenience or retaliation by staff.
- Formulate advance directives and to have hospital staff and practitioners who provide care in the hospital honor these directives.
- Be informed of his/her rights in a language the patient understands.
- Have a family member or representative of his/her choice and his/her own physician notified promptly of his/her admission to the hospital.
- Be informed of the right to have pain treated as effectively as possible.
- Choose a post-hospital care provider.
- Receive a written text of the *Patient Rights and Responsibilities* upon admission and available to all outpatients.

These rights shall also be posted in patient areas that are easily accessible for review by the public.

- Be informed about outcomes of care, including unanticipated outcomes.
- Freely voice complaints without being subject to coercion, discrimination or reprisal.
- Access guardianship, patient advocacy and child/adult protective services.

- Ask for and receive prompt review and resolution of a complaint.

If the resolution is unacceptable, the patient will be advised of the patient grievance mechanisms.

- Submit a complaint in writing to be reviewed by the hospital's formal grievance process. Review is performed by hospital employees who may include doctors, nurses, supervisors, administrators and quality review staff. The patient medical record will be reviewed and members of the team who cared for the patient will be interviewed.

Upon completion of the investigation which typically takes up to 30 days, a written response is sent back to the patient.

- File a complaint with the Centers for Medicare & Medicaid Services (1-877-267-2323), Ohio Department of Health (1-800-342-0553), Medicare Peer Review Organization (216-447-9604) or, if facility is Joint Commission accredited, Joint Commission (1-800-994-6610).

The patient is responsible for:

- Providing, to the best of his/her knowledge, accurate and complete information about matters relating to his/her health.
- Following the treatment plan.
- His/her actions if he/she refuses treatment or fails to follow the care plan.
- Being considerate and respectful to other patients, hospital personnel, hospital property and the property of others.
- Providing all needed information for insurance processing and for assuring that the financial obligations of his/her care are fulfilled.
- Asking questions when he/she does not understand information.
- Reporting episodes of pain and the effectiveness or lack of response to pain treatment.
- Reporting perceived risks and/or unexpected change in condition during the course of his/her care.
- Following all hospital rules and regulations.

All staff will be educated regarding patient's rights in orientation and annual re-education. Copies of the policies and procedures related to patient's rights and responsibilities are available to all staff.

University Hospitals

University Hospitals Case Medical Center is the flagship hospital anchoring the UH health system. Founded in 1866, UH Case Medical Center is renowned in the region, across the country and around the world for providing quality health care, for producing important medical innovations and advances, and for educating the next generation of physicians, nurses and health care professionals. With locations throughout Northeast Ohio, University Hospitals is close to home. For more information about UH, please visit UHhospitals.org.
