# Combined capabilities for a complete range of spinal care options.

University Hospitals Neurological Institute, in a collaborative effort with UH Richmond Medical Center's musculoskeletal specialties, Center for Comprehensive Orthopaedic Care and Center for Comprehensive Pain Management, announces the availability of innovative, multidisciplinary spinal care ... just minutes from where you live.

Introducing the Spine Center, a highly specialized facility focusing on surgical and nonsurgical treatment for patients suffering from pain and disorders related to the spine.

**Now, a full-service spine program is accessible to you conveniently, in the comfort and familiar surroundings of UH Richmond Medical Center.**

## Multidisciplinary approaches. Multidimensional care.

The Spine Center provides a comprehensive program of diagnosis, evaluation, treatment and outpatient rehabilitation.

From your very first point of contact at UH Richmond Medical Center, you will experience a continuum of care that includes the expertise of a musculoskeletal/Sports Medicine physician, pain management specialists, radiologists, neurologists and orthopaedists. They will work together to offer you the latest, safest and most effective pain therapies that address your specific needs and goals.

Our complete range of minimally invasive, inpatient/outpatient procedures and nonsurgical therapies treat lumbar and cervical conditions including:

- Herniated discs in the neck and back
- Spinal stenosis
- Pinched nerves
- Compression spine fractures
- Spinal cord compression
- Failed back syndrome
- Spine trauma
- Spinal deformity
- Carpal tunnel syndrome
- Sports injuries
- Degenerative back pain

## The Spine Center's capabilities focus on your problem. And your pain.

The Spine Center's musculoskeletal and interventional pain management physicians are trained to target and treat the source of your pain. Our surgeons are trained in both neurological and orthopaedic spine techniques. Each is driven by a dedication to research, and a philosophy of care that revolves around total patient education and involvement.

This unique combination of perspectives means that you will receive the most appropriate and effective treatment for your spine problem. You will be in control of your own case and empowered to be an active participant in your care plan...from diagnosis to rehabilitation.

And you'll experience this range of advanced care in the convenient, accessible, stress-free environment of your community hospital... UH Richmond Medical Center.
