

Epilepsy Center — Rainbow Pediatric Epilepsy Program

The Rainbow Pediatric Epilepsy Program, a collaboration of the Neurological Institute's Epilepsy Center and Rainbow Babies & Children's Hospital, offers the most advanced evaluation and treatment modalities to manage epilepsy for children. Designated as a Level IV Center, the highest recognized by the National Association of Epilepsy Centers, we evaluate and treat children with all types of seizures. Highlights of care include:

- State-of-the-art diagnostic modalities:
 - Pediatric Epilepsy Monitoring Unit
 - High resolution MRI
 - PET
 - SPECT
 - Magnetoencephalography (MEG) Program (Coming in 2009)
- Care provided in a family-centered, child-friendly environment at a dedicated children's hospital
- A dedicated pediatric epilepsy team with specialized training
- The newest anti-epileptic drug treatments and latest surgical therapies
- A Pediatric Epilepsy Coordinator that facilitates the scheduling of physician referrals, patient appointments and testing; works closely with the epilepsy surgery population, and provides one-on-one education to families, nurses and schools
