University Hospitals’ (UH) long-standing commitment to the community spans 150 years. This commitment has grown and evolved through significant thought and care in considering our community’s most pressing health needs. One way we do this is by conducting a periodic, comprehensive Community Health Needs Assessment (CHNA) for each UH hospital facility. Through our CHNA, UH has identified the greatest health needs among each of our hospital’s communities, enabling UH to ensure our resources are appropriately directed toward outreach, prevention, education and wellness opportunities where the greatest impact can be realized.

The following document is a detailed CHNA for University Hospitals Portage Medical Center (UH Portage Medical Center). UH Portage Medical Center provides an exceptional model of community-based care with an emphasis on wellness and convenient access to specialized medical and surgical services. UH Portage Medical Center is the second-largest employer in the county and has been recognized with the coveted Magnet designation. It is a full-service, nonprofit, acute-care hospital with extended services offered at health centers and outpatient facilities throughout the entire county.

The facility was fully integrated into the University Hospitals system in June 2015, which comprises a broad network of primary care physicians, specialists, ambulatory care centers, hospitals and related health care delivery services. Recent enhancements at UH Portage Medical Center include investments in state-of-the-art technology and medical equipment, expert services from University Hospitals Seidman Cancer Center, comprehensive care from University Hospitals Harrington Heart & Vascular Institute, Women’s Health Center and access to northern Ohio’s largest primary care physician network and more than 4,700 providers.

Please read the document’s introduction below to better understand the health needs that have been identified.

Adopted by the UH Board of Directors September 21, 2016.

INTRODUCTION TO REPORT

This report identifies and assesses community health needs in the areas served by UH Portage Medical Center in accordance with regulations promulgated by the Internal Revenue Service pursuant to the Patient Protection and Affordable Care Act (ACA), 2010. This CHNA was adopted by the UH Board of Directors on September 21, 2016.

This is the first UH Portage Medical Center community health needs assessment (CHNA) in response to the federal government regulation. The 2016 UH Portage Medical Center CHNA will serve as a foundation for developing an implementation strategy, required by the regulation, to address those needs that (a) the hospital determines it is able to meet in whole or in part; (b) are otherwise part of its mission; and (c) are not met (or are not adequately met) by other programs and services in the hospital’s service area.

Objectives: CHNAs seek to identify priority health status and access issues for particular geographic areas and populations by focusing on the following questions:

- **Who** in the community is most vulnerable in terms of health status or access to care?
- **What** are the unique health status and/or access needs for these populations?
- **Where** do these people live in the community?
- **Why** are these problems present?

The question of how the hospital can best use its limited charitable resources to assist communities in need will be the subject of the hospital’s implementation strategy. To answer these questions, this assessment considered multiple data sources, some primary (survey of market area residents, hospital discharge data) and some secondary (regarding demographics, health status indicators and measures of health care access).

UH Portage Medical Center’s CHNA took into account input from persons and organizations representing the broad interests of the community through interviews with community leaders, including social service agency leaders, public health commissioners, clergy, others, and focus groups of diabetes patients, cancer patients and a random sample of Portage County men. Particular focus was paid to ensure individuals interviewed represented medically underserved, low-income and minority populations as well as the public health sector. Each of these gave their individual and collective assessments of the strengths and limits of community health services and identified the gaps in health needs within the community.

This report addresses the following broad topics:

- Economic issues facing the hospital’s primary and secondary market areas (e.g., poverty, unemployment);
- Community issues (e.g., environmental concerns and crime);
- Health status indicators (e.g., morbidity rates for various diseases and conditions, and mortality rates for leading causes of death);
- Health access indicators (e.g., uninsured rates, ambulatory care sensitive (ACS) discharges and use of emergency departments);
- Health disparities indicators; and
- Availability of health care facilities and resources.

Written Comments

Individuals are encouraged to submit written comments on this Community Health Needs Assessment (CHNA) to CommunityBenefit@UHhospitals.org.

1 The Patient Protection and Affordable Care Act (Pub. L. 111-148) added section 501(r) to the Internal Revenue Code, which imposes new requirements on nonprofit hospitals in order to qualify for an exemption under Section 501(c)(3), and adding new reporting requirements for such hospitals under Section 6033(b) of the Internal Revenue Code.
EXECUTIVE SUMMARY

UH Portage Medical Center by the Numbers
• Eight primary service area municipalities (all in Portage County): Atwater, Garretsville, Kent, Mantua, Ravenna, Rootstown, Streetsboro and Windham
• Seven secondary service area municipalities (all in Portage County except where noted): Aurora, Stow (Summit County), Hiram, Mogadore, Deerfield, Diamond and Newton Falls (Trumbull County)
• Service area population, 2014: 217,013
• 83.6% of patient discharges were residents of its primary market area; 9.8% were residents of its secondary market area
• 20.3% of patient discharges were Medicaid patients; 51.2% were Medicare patients
• 22.2% of households have incomes <$25,000
• Population trends:
  – Proportionately, there was little change in Portage County's demographic composition from 2010 to 2014.
  – Portage County increased in population size by 0.5% from 2010 to 2014.
  – Portage County is growing older, on average.
  – Portage County is majority White (91.8%), but the percentage of the population that is White decreased by 0.5% from 2010 to 2014. Only 4.0% of the population in Portage County is Black or African-American, and 0.5% is of Hispanic/Latino descent.
• There exists a wide range of health status and access challenges across the community

This assessment focuses on the priority problems that impact the overall health of the community that surrounds UH Portage Medical Center. The majority of UH Portage Medical Center's service area is contained within Portage County. Key findings are as follows.

Poverty and transportation barriers impact access (to health services, healthy food and other necessities) and thus contribute to poor health.

• Almost 10% of all families in Portage County were living under the poverty line in 2014.
• The unemployment rate in Portage County in May 2014 was 4.4%, which was slightly lower than the national rate of 4.7%.
• From 2010 to 2014, more residents in Portage County gained private health insurance (increasing from 72.7% to 73.4%), Medicaid coverage (increasing from 14.0% to 14.9%) and/or Medicare coverage (increasing from 13.9% to 16.8%), with a resulting decrease in the uninsured rate (decreasing from 11.1% to 8.4%).

Ambulatory care sensitive (ACS) conditions are conditions for which “good outpatient care can potentially prevent the need for hospitalization or for which early intervention can prevent complications or more severe disease,” according to the Agency for Healthcare Research and Quality. For UH Portage Medical Center, 21.9% of discharges were ACS discharges of residents within the primary and secondary market areas combined. This may signal lower availability or access to primary care within the total market area. The most common primary ACS diagnoses for UH Portage Medical Center's discharged patients were congestive heart failure, bacterial pneumonia and chronic obstructive pulmonary disease (COPD). Almost one-fourth (23.3%) of discharged patients in 2014 were diabetic, and 39.8% had hypertension.

Priority Health Needs
After careful analysis of both qualitative and quantitative data, UH Portage Medical Center identified the following categories of health needs that impact the community served by the hospital as its priorities for the 2016 – 2018 period. These include (not listed in a specific order):

• Services for the elderly
• Services for lower income populations
• Access to primary care and specialists
• Obesity/access to healthy food
• Heart disease/stroke
• Substance abuse

CHNA Collaboration
UH Portage Medical Center worked closely with The Center for Health Affairs, the leading advocate for Northeast Ohio hospitals, to complete the 2016 CHNA. The Center advocates on behalf of 36 hospitals in six counties. University Hospitals Health System, Inc. retained The Center for Health Affairs to assist in quantitative and qualitative data collection and analysis and to ensure the entire community served by the hospital was captured. More information about The Center for Health Affairs is provided in Appendix A.
A. Definition of Market Area  
(Community Served by the Hospital)

UH Portage Medical Center is located in the city of Ravenna in Portage County, Ohio. Portage County is located directly east of Summit County (Akron metro area) and southeast of Cuyahoga County (Cleveland metro area).

There are only 322 residents per square mile in Portage County. Portage County is comprised of cities, villages and townships. Its county population is growing somewhat – for each of the past four 10-year periods, the county population has grown at least 5%. The county includes one large university (Kent State University).

UH Portage Medical Center’s market area covers predominantly the entire county given that it is a new UH acquisition and was historically a county-owned hospital. The secondary market area represents ZIP codes that are predominantly contiguous to Portage County, including parts of Trumbull, Mahoning, Geauga and Summit counties where patients served by the hospital reside.

Illustrated in Figure 1: UH Portage Medical Center Market Area, UH Portage Medical Center’s market area includes 15 municipalities (eight in its primary market area and seven in its secondary market area). It is almost completely contained within Portage County, Ohio. 83.6% of UH Portage Medical Center’s total discharges originate in the nine ZIP codes in the primary market area, and seven additional ZIP codes comprise an additional 9.8% of the hospital’s total discharges.

Shown in Table 1: UH Portage Medical Center: 2014 Hospital Discharges – Primary and Secondary Market Areas, in 2014, UH Portage Medical Center had 6,358 discharged patients. Of those, 5,316 were in the hospital’s primary market (83.6%) and 9.8% (622 discharges) were in the hospital’s secondary market area. Population-wise, the hospital’s primary market area contains 58.2% of the total market area’s general population.

The City of Ravenna was home to one-third of discharged patients in 2014 (37.1%), although only 15.5% of the total market area’s population lives in Ravenna. The City of Kent is the second most common source of patients for the hospital (17.7%).

Emergency department visitors (not necessarily inpatient visitors) were also heavily concentrated within UH Portage Medical Center’s primary market area (81%), especially Ravenna (44266), the home municipality of 38% of emergency room visitors in 2014, shown in Table 2: UH Portage Medical Center: 2014 Emergency Department Visits/Admissions by ZIP Code.

B. Introduction to Data Analysis

This report analyzed both primary and secondary data to draw conclusions regarding the priority health needs of the population within the UH Portage Medical Center community.

Primary Data

There were three main sources of primary data:

A. Survey Data

In March of 2016, the Portage County Health Status Assessment was released. It was the product of a collaborative effort among the Portage County Combined General Health District, the Kent City Health Department and The Center for Health Affairs. The report provided a comprehensive look at the health and well-being of adults, youth and children in Portage County. It is based on surveys of 847 adults, 407 youth (aged 12 – 18) and 432 children (aged 0 – 11) in 2015 conducted by the Hospital Council of Northwest Ohio.

The survey data and resulting analysis provide insight into county residents' attitudes toward health and health care as well as describe their actions and ongoing behaviors that potentially impact their health and well-being. Herein we present those survey findings that relate most closely to UH Portage Medical Center’s mission within the community. The full report of the survey findings can be found at http://www.hcno.org/pdf/counties/PortageCounty2015HealthAssessment.pdf.

B. Hospital Discharge Data

- Discharge data from the Ohio Hospital Association was used to describe hospital admission patterns for UH Portage Medical Center in 2014.

C. Qualitative Data

- Interviews were conducted with 17 community leaders including individuals representing public health, government agencies and social service agencies.

- Three focus groups were conducted by The Center for Health Affairs with diabetic patients, cancer patients and randomly selected adult males who are residents of Portage County. The diabetic and cancer patients were all previous participants in an ongoing information and support group managed by the UH Portage Medical Center; all were adults. A total of 34 adults were included in these three focus groups.

Qualitative Data Analysis Summary

To help provide a complete understanding of the health needs and concerns in Portage County, UH Portage Medical Center, in collaboration with The Center for Health Affairs, solicited the input of individuals who represent the broad interests of the community and individuals in leadership roles in public health, in the form of both community leader interviews and focus groups.

Community Leader Interviews

UH Portage Medical Center developed a comprehensive list of 31 health care, government and social service leadership throughout Portage County. From that comprehensive list, The Center for Health Affairs completed a total of 16 telephone interviews with 17 community leaders from May 2016 to June 2016. All interviewees were told the purpose of the interviews and assured confidentiality. A copy of the interview leader guide can be found in the Appendix.

Community leaders from the organizations listed below were interviewed:

- Axess Pointe
- Children's Advantage
- Coleman Professional Services doing business as Coleman Pregnancy Center
- Coleman Professional Services
- Kent City Health Department
- Kent State University Health Services
- Mental Health and Recovery Board of Portage County
- Portage Area Regional Transportation Authority (PARTA)
- Portage/Columbiana WIC
- Portage County Combined General Health District
- Portage Community Chapel
- Portage County Department of Job and Family Services
- Renaissance Family Center
- The Children's Advocacy Center of Portage County
- TownHall II
- United Way of Portage County

Each of these organizations represents medically underserved, low-income or minority populations in the UH Portage Medical Center service area.

The top three health issues or concerns identified by those interviewed were mental health and substance abuse issues, access to care and high rates of chronic disease. Interviewees overwhelmingly cited a need for more crisis services to respond to mental health or drug/alcohol issues. Access to care is hampered by transportation barriers that exist due to the rural nature of the county. High rates of chronic disease were frequently mentioned as being problems that often stem from poor nutrition.
When asked to identify the most significant barriers that keep people in the community from accessing health care when they need it, the following barriers were discussed: transportation, long wait times for treatment of behavioral health issues, an insufficient number of detoxification facilities, lack of awareness of available resources, the high cost of copayments and deductibles for those with private health insurance, limited dental providers and language barriers due to limited English proficiency (specifically for Kent State University’s international students).

Respondents predominantly agreed that there are specific populations in the UH Portage Medical Center service area that should have health care services targeted to them. Residents of the Village of Windham were mentioned as having insufficient health care providers and transportation barriers that impact their ability to access care. The large aging population in Portage County prompted many to mention the need to target sufficient services for the elderly. The growing international student population at Kent State University is prompting a need to change the way health care services are delivered to this student population and their families.

Respondents provided several recommendations that may help to improve the health and quality of life in the community. Some recommendations included:

- Increase health education and programming and start at younger ages
- Closer collaboration with community partners and the faith-based community
- Increase the number of detox facilities, residential treatment centers and inpatient psychiatric beds
- Develop integrated care models to address behavioral health and physical health issues simultaneously
- Develop more mobile health units

Focus Groups

A series of three focus groups was conducted in June of 2016 to describe the health care marketplace through the eyes of the residents who use it. Two groups were done of those living with a chronic disease (diabetes and cancer). A third was done with adult males.

Findings:

1. **First and foremost, residents are eager for any information that can help them understand what to do in order to be healthier.** It was equally clear that they saw both UH Portage Medical Center and the physician/nurse practitioner community as the authorities on health information in the county. In sum, they viewed those medical institutions and clinicians as being responsible for more than just providing care – they are also viewed as being responsible for educating the community on how to be healthier and on how to find the right medical care.

2. There was not a large request for more primary care providers, despite many reporting that they have had to change their primary care provider due to retirements or deaths. There was, however, consensus that **there is a need for more specialists.** All of those in the cancer patient or diabetic groups required specialized care. The cancer patients were able to find that care in Akron and/or Cleveland, but preferred receiving that care closer to home. The diabetic patients, however, did not have specialists for their care. Instead of being cared for by endocrinologists, they managed their diabetes via their “general practice” providers.

3. Residents generally accept that they need to go to a hospital in one of the nearby cities (Akron or, less commonly, Cleveland) for certain medical needs. While they are not happy about the lack of a “full-service” hospital in their immediate area, they were not terribly inconvenienced by the need to be hospitalized in Akron or Cleveland for certain conditions.

4. **Cancer patients received far more support services than diabetic patients did.** Cancer patients reported referrals to social service agencies or other support services (e.g., wig fittings) almost immediately upon diagnosis. In sharp contrast, diabetic patients had to seek information on their own, often without any guidance from medical professionals. There was a fairly strong sense of skepticism that the information they were receiving from their physicians, albeit sparse, was accurate. They strongly urged the hospital to take the lead in communicating more to the community on how diabetics can best manage their disease.
5. Most did not feel that Portage County was a particularly unhealthy place. There were some complaints about pollution (from Akron), but the opportunities to exercise and the level of safety (lack of crime) were generally positive. Many did feel that “low cost, but healthy” food was very difficult to find in the county. Most felt they would eat higher quality foods if they could afford to.

6. The biggest “complaint” about health care was, by far, the cost. Many reported that their annual deductibles were impossible for the household to manage, and some had forgone treatment and/or medication because of the costs.

Secondary Data
There were several sources of secondary data:

• U.S. Census. 2010 Decennial Census, American Community Survey (projections to 2015) (Demographic data; Poverty data)

• U.S. Bureau of Labor Statistics, 2016 (Unemployment data)

• U.S. Health Resources and Services Administration (HRSA) (medically underserved areas and populations, and food deserts)

• Health status and access indicators available from:
  – County Health Rankings & Roadmaps; Robert Wood Johnson Foundation Program, 2016
  – Ohio Department of Health, 2014
  – U.S. Centers for Disease Control and Prevention, CHSI Information for Improving Community Health, Community Health Status Indicators Project, 2015

Information Gaps
To the best of The Center for Health Affairs’ knowledge, no information gaps have affected UH Portage Medical Center’s ability to reach reasonable conclusions regarding community health needs.
C. Demographic Characteristics of UH Portage Medical Center’s Market Area

As illustrated in Figure 2: Market Area Population Size Trends, Portage County had a 0.5% increase in population from 2010 to 2015. Portage County is a primarily rural county with some edge communities that are considered suburbs of the metro areas of Cleveland or Akron. There are only 322 residents per square mile in Portage County. Given that Portage County’s boundaries include Kent State University, there is a population swell of 41,000 adults while the university is in session.

Portage County is growing older, on average, as illustrated in Table 3: Demographic Trends in Portage County: By Gender, Age and Race. In 2014, the proportion of senior citizens increased by 1.1 percentage points in Portage County compared to 2010. This change is small, but given that the use of health care increases substantially with age, especially after age 65, the aging of the population will have significant impacts on the demand for health care in regions where the proportion of older citizens is increasing. Portage County is majority White (91.8%) and almost completely lacks any racial diversity – only 4.0% of the population is Black or African-American and 0.5% is of Hispanic/Latino descent. However, Kent State University has a sizable international student population. While language issues were mentioned by community leaders as being a potential barrier to accessing health care for Kent State University’s international students, the majority of Portage County residents speak English at least “very well,” and language barriers are not considered a large problem for the majority of Portage County residents.

From 2010 to 2014, the average (median) income decreased by 3.4% in Portage County, as shown in Table 4: Economic Trends in Portage County: Income and Poverty. Mean household income increased by 3.4% during that same time period. This suggests that the county is attracting some individuals with higher incomes. The decreased average median income is generally due to more people being in retirement.

The proportion of households with Social Security income increased from 2010 to 2014 by 3.3% in Portage County and the average (mean) income from Social Security increased by 0.9% in Portage County. Mean retirement income (from pensions, 401(k) disbursements) decreased by 1.6% in Portage County during that time period.

A very small percentage of the population in Portage County receives cash public assistance, and the proportion decreased by 1.4% from 2010 to 2014. The size of cash public assistance decreased by 22.1% during that time period in Portage County. The proportion of households receiving Food Stamp/SNAP benefits increased by 1.2% from 2010 to 2014. The percentage of Portage residents who were Medicaid beneficiaries increased by 0.9% from 14.0% to 14.9% during the same period.

There was a slight increase in the proportion of the Portage County population receiving Food Stamps from 2010 to 2014, which is likely due to the increased elderly population. Focus group participants expressed awareness about food distribution centers for low-income individuals.

Approximately 1 in 10 households in Portage County live under the poverty line, as illustrated in Table 5: Most Economically Vulnerable Portage County Residents. However, the percentage of families living under the poverty line decreased by 1.0% from 2010 to 2014. Families with children under 18 are almost twice as likely to live below the poverty line. A majority (52.9%) of single-mother households with children under 18 are living below the poverty line, and this has worsened since 2010 in Portage County.

The percentage of individuals with health insurance coverage increased by 2.7% in Portage County from 2010 to 2014. The percentage of Portage County residents who were Medicaid beneficiaries increased by 0.9% from 14.0% to 14.9% from 2010 to 2014. The percentage of Portage County residents receiving Medicare coverage increased from 13.9% to 16.8% during that same time period.

Table 6: Portage County, Statistics on Population 65+ shows that almost 14% of the population in Portage County is elderly and 1 in 4 elderly residents in the county is a veteran. Mirroring the demographics for the entire population in Portage County, the majority of the elderly population is White. Many elderly individuals are living alone (almost 4 in 10), and almost one-third have a disability. Most of the elderly in Portage County own their own homes.

Given that Portage County is a rural county, Portage County residents cited concerns about being able to access health care given the geography of the county. Focus group participants also cited concerns about being able to afford health care, in particular being able to afford their copayments.

Finally, according to the U.S. Bureau of Labor Statistics, the unemployment rate in Portage County is the 48th highest in Ohio and was 4.4% in May of 2016.

D. UH Portage Medical Center Patients Served

Table 7: Hospitalizations, UH Portage Medical Center Versus Other Hospital Discharges, 2011 – 2014 illustrates where Portage County residents were inpatients from 2011 to 2014. The number of Portage County residents hospitalized at any Ohio hospital decreased by 11.4% from 2011 to 2014. While the percentage of Portage County residents admitted as inpatients at any hospital other than UH Portage Medical Center increased 2.7% from 2011 to 2014, the percentage of Portage County residents admitted as inpatients at UH Portage Medical Center decreased by 29.3% during that same time period.

Table 8: UH Portage Medical Center, 2014 Discharges, by Payer shows that UH Portage Medical Center’s primary market was the source of most of its inpatient admissions in 2014 (83.7%). In the focus groups, most suggested that those who live farther away from the hospital go to hospitals outside of the county. Ravenna, the city in which UH Portage Medical Center is located, is the most common ZIP code for inpatient admissions.

Of all patient discharges in 2014, more than half (51.2%) were Medicare patients and 20.3% were Medicaid patients.

Some differences exist across ZIP code areas within the primary market. Within the majority of ZIP codes in the primary market area, roughly half of patients discharged were Medicare patients. Certain ZIP codes had a higher percentage of Medicaid discharges, including one of the Kent ZIP codes (50%) and Windham (30.3%). Many community leaders interviewed cited concerns about limited access to health care for residents of Windham.

UH Portage Medical Center provides maternity services, and roughly 20% of its inpatients each year are either newborns or their mothers. The hospital does not treat pediatric patients. Of adult patients (mothers of newborns and others), about 1 in 5 are aged 45 or younger as illustrated in Figure 3: Age of UH Portage Medical Center’s Discharged Patients, 2014. Another 25% are aged 46 – 65, and the largest age cohort is that over age 65 (45%).

E. Ambulatory Care Sensitive Discharges

Using discharge data from UH Portage Medical Center, which includes the reason for patient admission into the hospital, “ambulatory care sensitive discharges” can be identified. Ambulatory care sensitive (ACS) conditions are conditions for which “good outpatient care can potentially prevent the need for hospitalization or for which early intervention can prevent complications or more severe disease,” according to the Agency for Healthcare Research and Quality. The incidence of ambulatory care sensitive discharges has been used as an index of adequate primary care in a market area. The diagnostic categories (and associated ICD-9-CM codes) can be found in the Appendix.

Table 9: UH Portage Medical Center, Primary and Secondary Diagnoses of Adult (Age 16+) ACS Discharges in 2014 (Non-Maternity) shows the number of adult discharges for UH Portage Medical Center in 2014 and the percent that were ACS cases. For all discharges, there are both primary and non-primary diagnoses (“secondary” diagnoses), and both are shown in the table. Patients can have up to 14 different secondary diagnoses. For UH Portage Medical Center, 21.9% of discharges were ACS discharges of residents within the primary and secondary market areas combined. This may signal lower availability or access to primary care within the total market area.

There are some differences in ACS conditions based on a patient’s gender. Males were twice as likely to have a primary or secondary diagnosis that was an ACS condition than females in 2014 (31.5% vs. 15.4%, respectively). Also, female discharged patients were more likely than males to have a diagnosis of asthma (11.2% vs. 4.6%) or kidney failure/urinary tract infection (10.5% vs. 5.2%). Male discharged patients were more likely than females to have a diagnosis of congestive heart failure (31.9% vs. 19.4%) or diabetes (29.7% vs. 20.4%).

The most common primary ACS diagnoses for UH Portage Medical Center’s discharged patients were congestive heart failure (5.0%), bacterial pneumonia (3.9%) and chronic obstructive pulmonary disease (COPD) (3.8%). In terms of secondary diagnoses in 2014, congestive heart failure comprised an additional 23.3% of discharges and COPD comprised an additional 15.1% of discharges. Almost one-fourth (23.3%) of discharged patients in 2014 were diabetic and 39.8% had hypertension. Some community leaders interviewed expressed concerns about seeing greater numbers of patients with diabetes, which is expensive to manage and complicated.

Table 10: Portage County Versus Contiguous Counties, 2014 Discharges, Adults (Non-Maternity) Only, displays the number of adult discharges with ACS conditions among all county residents who were admitted to an Ohio hospital in 2014. The incidence of ACS conditions is almost the same across all counties.

Table 11: Adults, Non-Maternity, ACS Cases by Payer shows the number of adult discharges with ACS conditions by different payers. The greatest percentage of ACS conditions was among individuals classified as receiving charity care or for whom care was uncompensated by a payer (35.1%). Individuals with traditional fee-for-service Medicare coverage had the next highest percentage of ACS conditions among payers (28.2%). Commercially insured patients had the lowest percentage of ACS conditions (18.7%).

UH Portage Medical Center Discharges

This section again examines UH Portage Medical Center's discharge data (for non-maternity case adults), but here we look at all discharges (not just those with Ambulatory Care Sensitive diagnoses); these data provide primary and secondary diagnosis information for each patient discharged in 2014. This evaluation seeks to identify particular diagnoses or diagnostic categories that can shed light on how public health or preventive care initiatives could impact the overall health of market area residents via preventing disease states that lead to a high number of hospitalizations. Table 12: UH Portage Medical Center, Primary and Secondary Diagnosis of Adults (Non-Maternity Cases, Age 16+) Discharged in 2014 shows the percentage of discharges based on the major diagnostic category of adult patients’ primary and then secondary diagnoses. There are over 17,000 different medical diagnostic codes. For specific diagnoses, only those that were relatively common are shown.

In 2014, the most common diagnostic category was circulatory system diseases (22.0% of primary diagnoses). Topping the list of specific primary diagnoses in that category was heart failure (5.8%). In addition, a great number of patients had a secondary diagnosis of hypertension (39.8%).

In 2014, the second most common primary diagnostic category was diseases of the genitourinary system (20.8%) and then respiratory system (16.4%), the third. In particular, acute renal failure (2.5%), pneumonia (4.3%), chronic bronchitis (4.2%) and other lung diseases (4.0%) were very common primary diagnoses in those categories. Many of the lung diseases are often associated with tobacco use.

While endocrine and metabolic disorders were rarely primary diagnoses (5.3%), they were very common secondary diagnoses, especially diabetes (29.5%) and lipoid metabolism diseases (33.6%). And, finally, while few discharged patients in 2014 had a mental illness as a primary diagnosis (2.0%), mental illnesses were fairly common secondary diagnoses, especially nondependent drug abuse (8.2%).

F. Portage County Health Rankings, Mortality and Morbidity, Health Care Access and Quality

Portage County, Health Rankings

The Robert Wood Johnson Foundation produces an annual report that ranks counties in Ohio based on two major indices of population health: health outcomes (length and quality of life) and health factors (health behaviors, clinical care, alcohol and drug use, social/environmental factors and physical environment). A rank of “1” is the best, “88” is the worst in the state of Ohio.

Source: County Health Rankings & Roadmaps; Robert Wood Johnson Foundation Program, 2016.

Table 13: Portage County Health Rankings identifies Portage County’s rank. UH Portage Medical Center’s market area is almost completely contained within Portage County; therefore, understanding where Portage County as a whole ranks in Ohio in terms of health is useful. It is important to note that in many of Ohio’s counties, the differential between health outcomes and health factors is relatively small. Compared to other counties in Ohio, Portage County ranks relatively high overall on health outcomes and health factors. However, Portage County ranks 73rd out of 88 counties on physical environment. There are five measures that comprise the physical environment subcomponent (air pollution-particulate matter; drinking water violations; severe housing problems; driving alone to work; and long commute – driving alone). Focus group participants highlighted two areas of concern in terms of the physical environment in Portage County: (1) there are almost no sidewalks in Portage County and (2) pollution drifts over from Akron.

Mortality and Morbidity

Cancer is the leading cause of death for adults in Portage County, followed by coronary heart disease as displayed in Table 14: Most Prevalent Causes of Death or Impaired Health – Adults. Portage County compares unfavorably to its peer counties across the U.S. in terms of deaths attributable to cancer, strokes and diabetes. Strokes, accidents, diabetes and kidney disease combined account for far fewer deaths than cancer in Portage County.

Focus groups of cancer patients and diabetes patients were conducted. The concerns expressed by participants in each of these two focus groups were very different, particularly regarding the availability of community-based services available to help patients upon diagnosis.

Cancer patients expressed that they felt enveloped in supportive services almost immediately following diagnosis – including referrals to support services and information about their disease and treatment. In contrast, diabetes patients expressed a feeling that there is little support for them in the community and that they desired more information. While a new diabetic support group program created at UH Portage Medical Center has been incredibly helpful, there was a feeling that many diabetics weren’t aware of the group. Participants in the diabetic focus group strongly encouraged the hospital to promote the service and provide additional support services for diabetics.

Linked to the most common death rates are common habitual behaviors. More than one-fourth of Portage County residents are obese (BMI > 30); 1 in 4 are tobacco smokers as displayed in Table 15: Most Prevalent Morbidity – Adults and Youth. Rates of obesity, smoking, older adult depression, Alzheimer’s disease and preterm births are higher in Portage County compared to its peer counties. One community leader interviewed shared that Kent State University will become tobacco-free on July 1, 2017, which may influence smoking rates in Kent.

Health Care Access and Quality

Finally, the CDC also designates Portage County as one with lower-than-average access to primary care providers, and the county has a higher-than-average rate of preventable hospitalizations for older adults (85.2 per 1,000 Medicare enrollees) as shown in Table 16: Health Care Access and Quality – Portage County. Access to primary care providers is particularly concerning in the city of Windham, according to the majority of community leaders interviewed.

G. Primary Analysis of Representative Sample of Market Area Population

To further understand Portage County health needs, the following section presents the results of a survey of Portage County adults, youth and children regarding their health and access to health care. In March of 2016, the Portage County Health Status Assessment was released. It was the product of a collaborative effort between the Portage County Combined General Health District, the Kent City Health Department, and The Center for Health Affairs. The report provided a comprehensive look at the health and well-being of adults, youth and children in Portage County. It is based on surveys of 847 adults, 407 youth (aged 12 – 18) and 432 children in 2015 conducted by the Hospital Council of Northwest Ohio.

Population Health Status

In this section we describe the health status of the population within Portage County, which comprises the bulk of UH Portage Medical Center’s primary market area.

Access to Ongoing Primary Care

In our focus groups of residents, most reported an ability both to find a primary care provider and to obtain an appointment to see their primary care provider within an acceptable period of time. There were concerns, however, regarding the number of qualified specialist physicians. Most survey respondents (4 in 5) reported that they did have “someone they considered to be their personal doctor or health care provider.” Very few adults (<1%) reported not having a primary care physician or other provider because there isn’t one close enough to where they live. Shown in Figure 4: Self-Described General Health Status, most surveyed adults (82.8%) report their “overall health” as at least good. Only 3.1% of Portage County adults rated their health as “poor.”

We see large differences, however, among resident groups in terms of their self-described health status:

- Women were far less likely to report their health as “excellent” or “very good” (44%) than men (61%).
- Most of those under age 30 reported an “excellent” or “very good” health status (68%). But only half (50%) of those aged 30 – 65 did so, and only 42% of those over age 65 did.
- Those in the lowest income bracket (<$25,000) were unlikely to report a positive health care status (only 32%).

Adults in Portage County reported that their physical health was “not good” an average (mean) of 3.7 days during the 30 days prior to the survey, as displayed in Table 17: Self-Described Physical and Mental Health Status: Past 30 Days. On average, this group reported that their mental health was “not good” an average (mean) of 4.7 days. For them, these less-than-optimal health days prevented them from doing their normal activities (work, school) an average of 2.4 days within that 30-day period. Note that most (56%) reported zero days with physical health problems within the 30-day period, and 52 percent reported zero days with any mental health issues during that time. About 1 in 4 (72%) reported that their health didn’t keep them from any of their normal activities within the past 30 days.

</tbody>
</table>
Health Care Coverage

As displayed in Table 18: Percent of Adults with Health Coverage, 2015, a majority of adults in Portage County have health coverage (90%). Those aged 30 – 64 were least likely to have health care insurance at the time of the survey (88%). Those aged 65 and older (96%) and under age 30 (97%) were the most likely to be insured. Females were more likely to be insured (93%) than males (88%).

While health care coverage is almost ubiquitous, having coverage does not equate to full use of desired or needed medical services, as shown in Table 19: Lack of Access to Primary Care, 2015. 1 in 5 survey respondents reported not having a primary health care provider, which can lead to minimal use of screening and preventive care and delay of care when urgent medical services are needed. And, despite having insurance, many fail to seek or cannot afford care when needed because of high deductibles or even the inability to pay copays.

In the theoretical situation when health care was needed, the most common barrier to receiving care was cost. And, in practice, 1 in 10 adults reported not receiving care within the past year because of financial limitations.

In sum, many (25%) reported that the cost of care might prevent them from obtaining care if they needed it as shown in Figure 5: Barriers to Obtaining Health Care. Furthermore, 22% reported that in the previous year they did need care but did not seek it because of cost.

- Besides cost, convenience of access to care also prevented many from obtaining care: 10.5% could not get time off from work; 6.4% reported that the hours for care were not convenient; and 1.5% reported lack of transportation.

- A small but important proportion of residents (7.1%) reported difficulty in obtaining an appointment and hence did not receive care when needed.

Of those with health insurance coverage, 7 in 10 (73%) have a private source of insurance as shown in Figure 6: Source of Insurance Coverage. Most commonly those with private health care coverage have it primarily paid for by their own employer (46%), and many obtain it through another person’s employer-provided coverage (13%). A substantial portion (23%) obtain their coverage through a public source, most often Medicare (14%) or Medicaid (5%).
FIGURE 6: SOURCE OF INSURANCE COVERAGE

- Your employer: 46%
- Someone else's employer: 13%
- Multiple including at least one private: 6%
- A plan that you or someone else buys on your own: 5%
- Health Insurance Marketplace: 3%
- Medicare: 14%
- Medicaid or Medical Assistance: 5%
- Multiple including only government insurance: 3%
- The military, CHAMPUS, TriCare, CHAMPVA or the VA: 1%
- Some other source: 3%
- Unsure: 2%
Health Care Utilization

Table 20: Incidence of Receiving Routine Health Care: Portage County shows that seeking and obtaining preventive care (general medical or dental checkup) was completed by a majority of adults in UH Portage Medical Center’s market area. Males were less likely to obtain prostate cancer screenings than females were to obtain clinical breast exams, Pap smears or mammograms. Some preventive tests are routinely obtained by fewer than half of survey respondents.

Health Care Information

One key finding from the focus groups was the importance of information for people in managing their own health and also UH Portage Medical Center, and the physician base in the county, as a source of that information. The hospital and the physicians were seen as the critical authority when it comes to health care information. For the most part, there was an expressed thirst for information, and this was particularly true for diabetics. Focus group participants urged the hospitals (and physicians) to provide as much information as possible, in as many ways as possible, to the community regarding ways they can improve their health. While knowledge does not always lead to behavioral changes, many focus group participants reported simply not knowing how to manage their chronic disease at a very basic level.

Table 21: Health Care Providers’ Communication of Key Health Supporting Behaviors, Portage County shows that although about 3 in 4 surveyed adults had obtained a medical checkup within the two years prior to the survey; for many that checkup did not include discussions about diet, exercise, injury prevention or healthy sexual practices. Likewise, most were not counseled on the importance of family history as it relates to health or their immunization status.

While obesity levels are high among the adult population, not all have had discussions with a health care provider about improving that health condition (37% have never discussed diet/eating habits and 32% have never discussed physical activity or exercise).

Emotional and Mental Well-Being

Focus group participants did not highlight a lack of emotional or mental health in their daily lives. However, the 2015 survey of adults in Portage County showed that 15% recently had a “period of two or more weeks when they felt so sad or hopeless nearly every day that they stopped doing usual activities.” A significant proportion, 5%, attempted suicide in the year prior to the survey. Note that females were far more likely to attempt suicide than males (8% vs. 2%).

Sources of Assistance Programs/Services in Portage County

Focus group participants felt that access to services in Portage County, for the most part, was good. The one exception to that was support services specifically for diabetics. Despite the impression of focus group participants, most of whom never required assistance services, some adult residents did need but could not find the specific types of services described in Table 22: Assistance Programs/Services in Portage County.

Youth Survey

In this section we present the results of surveys of Portage County youth (grades 6 to 12) regarding their health and safety behaviors and attitudes. The findings from this survey highlight risky behavior and the formation of healthy habits more so than health issues themselves.

Obesity is prevalent among youth in Portage County, as it is among adults. Fifteen percent of youth reported a Body Mass Index that is associated with obesity. In contrast, many reported food insecurities: 11% reported that they went to bed hungry at least one night per week because their family could not afford enough food. One percent of youth went to bed hungry every night. Focus group participants reported that they felt healthy food was too expensive and that there was a shortage of “healthy food options” in the county overall. Most, however, were aware of no-cost food distribution locations and felt that these were taken advantage of by those in need.

Teens in Portage County often engage in risky behavior as illustrated in Table 23: Personal Safety: Risky Environments and Behaviors. Overall, 6% of the county’s youth were smokers at the time of the survey, and this was most prevalent among those aged 17 and above (10%). Almost half (47%) of those in grades 6 – 12 had already had at least one alcoholic drink. By age 17, this increased to 71%. One-third (37%) of high-schoolers aged 17 and above had at least one drink in the past 30 days. Binge drinking was common among those teens who were alcohol consumers: 49% reported at least one episode of binge drinking in the 30 days prior to the survey. Five percent of youth drivers reported drinking and driving at some point.

Illicit drug use was also prevalent among youth. Of 6th to 12th graders, 1 in 10 had used marijuana in the 30 days prior to the survey, and this increased to 17% among those 17 and older. Many (7%) had used medications prescribed for others at least once in their lifetime, and this was so for 11% of those over age 17.

Approximately one-fourth of youth in Portage County were sexually active in 2015 and 11% were both sexually active and used no method of birth control during their most recent sexual encounter prior to the survey.

Table 24: Personal Safety shows that many (23%) teens in UH Portage Medical Center’s market area reported being in a physical fight in the year prior to the survey, and about half (43%) reported being bullied within the year prior to the survey. Blows to the head (due to sports contact) were also quite common (12%).

Mental health issues were frequent diagnoses among UH Portage Medical Center adult discharges in 2014, as displayed in Table 25: Mental Health Issues. Surveyed youth reported frequent mental health issues also.

Child Survey

The 2015 survey of Portage County households with children described access to health care for Portage County families with young children along with the prevalence of various health conditions.

Most (99%) children aged 0 to 11 in Portage County have health insurance coverage; 24% are covered via publicly provided coverage, primarily Medicaid. While most (81%) have a personal doctor or nurse for their ongoing care, slightly more (85%) had been to their health care provider for preventive care in the year prior to the survey. Almost all (95%) children had received all of their recommended vaccinations.

Respondents were shown a list of the most common health issues that children face and were asked if their child had ever been diagnosed with any of the health issues on the list. The results are displayed in Table 26: Morbidity of Childhood Health Issues. The most common health issue diagnosed among children in Portage County was asthma (15%). The second most common health issue diagnosed was attention deficit disorder/attention deficit hyperactivity disorder (7%), followed by learning disability or anxiety problems (6%). Slightly fewer (5%) had been diagnosed with a developmental delay or physical impairment. Pneumonia was fairly common among children in the county (4%); recall that pneumonia was a common ACS condition among adults discharged from UH Portage Medical Center. About as many (5%) had been diagnosed with a behavioral/conduct problem.

Note that asthma appears to be more prevalent in Portage County (about two times as prevalent) than in Ohio and in the U.S. overall.

H. Infant Mortality

This indicator reports the rate of deaths to infants less than one year of age per 1,000 births. This indicator is relevant because high rates of infant mortality indicate the existence of broader issues pertaining to access to care and maternal and child health. Data at the ZIP code level (and hence hospital market area) are not available; only data at the county level are available.

Because infant mortality is measured in deaths per 1,000 births, the low number of Black births in Portage County – fewer than 100 per year – make it difficult to compare infant mortality rates, both from year to year in the county as well as with other counties with similarly low birth rates. With such low birth rates, even very small changes in actual numbers will create large variances in the rates. However, the data in Table 27: Infant Mortality Trends, 2007 to 2014, U.S., Portage County, and Surrounding Counties, per 1,000 Births and Figure 7: Infant Mortality Trends, 2007 to 2013, U.S., Ohio and Portage County, per 1,000 Births show that the infant mortality rate per 1,000 births in Portage County (2.6) was lower than Ohio overall (6.8) in 2014.

FIGURE 7: INFANT MORTALITY TRENDS, 2007 TO 2013, U.S., OHIO AND PORTAGE COUNTY, PER 1,000 BIRTHS

![Graph showing infant mortality trends from 2007 to 2013 for the United States, Ohio, and Portage County. The graph compares white and black infant mortality rates across different years.]
I. Unhealthy Behaviors

Certain unhealthy or risky behaviors are fairly prevalent among adults in Portage County as illustrated in Table 28: Incidence of Unhealthy/Risky Behaviors: Portage County. Our survey found that 13% of those in Portage County were cigarette smokers at the time of the survey in 2015. In addition, 11% reported using illicit drugs recreationally.

A significant proportion of households in UH Portage Medical Center’s market area either store a firearm that is not locked (9%), is loaded (11%), or is both unlocked and loaded (5%). About 1 in 10 (11%) adults in Portage County do not always wear a seat belt while driving in a vehicle.

Among the adult population, unhealthy consumption of alcohol (binge drinking) occurred two or more times in the 30 days prior to being surveyed for 13% of the adult population. Many (7%) reported binge drinking (five or more drinks) at least once a week.

J. Incidence of Adult Health Issues

As shown in Table 29: Chronic Disease Incidence: Proportion of Adults Diagnosed at Some Point, Portage County, hospitalization discharge data for Portage County Medical Center showed a large incidence of hospitalization, for many medical reasons, among those with diabetes and high blood pressure. Both of those health conditions impact many in the general population, but are highly related to hospitalization.

For high blood pressure and diabetes, the incidence within the hospitalized and discharged patients was far higher than in the general population. While we caution against assuming that there is a causal relationship between each of these chronic diseases and hospitalization, the high coincidence of these chronic states and hospitalizations suggests that perhaps better ongoing patient management of those with those chronic conditions would lead to lower hospitalization rates.

Prostate and breast are the two most common cancer diagnoses in Portage County, as shown in Figure 8: Annual Incidence, Portage County Versus Ohio and U.S., per 100,000 Population. Note that prostate cancer and lung cancer rates in Portage County are higher than rates in the U.S. and in Ohio. Breast cancer and colon and rectum cancer rates are lower in Portage County compared to the state and the U.S.

K. Vulnerable Populations

Medically Underserved Areas, Federally Qualified Health Centers and Food Deserts

Medically underserved areas/populations (MUAs/Ps) are areas or populations designated by the U.S. Department of Health and Human Services’ Health Resources and Services Administration (HRSA) as having insufficient primary care providers, a high infant mortality rate, high poverty or a high elderly population. Currently there are four MUAs/Ps identified within UH Portage Medical Center’s market area.

Federally Qualified Health Centers (FQHCs) are community-based organizations that provide comprehensive primary care and preventive care, including health, oral and mental health/substance abuse services to persons of all ages, regardless of their ability to pay or health insurance status. There are two FQHCs in UH Portage Medical Center’s service area.

In addition, pinpointing food desert locations in a hospital’s service area can help to identify areas with insufficient access to healthy and affordable food. According to the U.S. Department of Agriculture, food deserts are defined as “urban neighborhoods and rural towns without ready access to fresh, healthy and affordable food.” Rather than having grocery stores in these communities, there may be no food access or limited access to healthy, affordable food options. The Food Desert Locator, created by the U.S. Department of Agriculture’s Economic Research Service, is a Web-based mapping tool that pinpoints food desert locations in the U.S.

The map in Figure 10: Medically Underserved Areas/Populations, FQHCs and Food Deserts: UH Portage Medical Center overlays medically underserved areas and food deserts to determine areas that may have the highest need for services. To provide further context, the map also pinpoints the location of FQHCs and FQHC lookalikes.
FIGURE 10: MEDICALLY UNDERSERVED AREAS/POPULATIONS, FQHCS AND FOOD DESERTS: UH PORTAGE MEDICAL CENTER

Note: The large blank portion east of where UH Portage Medical Center is located is a military installation and is not part of the hospital's service area.
ACS Analysis of Vulnerable Populations

Revisiting the ACS data can provide further insight into the level of access to health care for vulnerable populations.

Ethnicity and Race

In many areas of the U.S., certain ethnicities or races are sometimes designated as part of a vulnerable population, primarily because of their associated socioeconomic status. In Portage County, there is a small percentage of people of Hispanic/Latino descent (0.5%). Likewise, there are few African-Americans (4.0%). However, while African-Americans comprise only 4% of the Portage County population, they comprised slightly more, 5.2%, of the inpatient population for UH Portage Medical Center in 2014.

Overall, there was a slightly lower prevalence of ACS conditions among African-American residents (21.6%) in UH Portage Medical Center’s market area (from all area hospitals) compared to White residents (22.2%) as illustrated in Table 30: UH Portage Medical Center: Most Common ACS Conditions, 2014, White Versus African-American Discharges (Adult, Non-Maternity Inpatients Only). However, this varies by specific ACS diagnoses for residents of UH Portage Medical Center’s market area. For example, the ACS diagnoses of diabetes and asthma were higher proportionally among African-Americans. In contrast, bacterial pneumonia, cellulitis and kidney/urinary infections more common diagnoses among Whites.

The Elderly

Given the small percentage of racial and ethnic minorities in Portage County, the larger vulnerable population within Portage County is comprised of the elderly. Recall that over one-third live alone in their household, and one-third are disabled. Roughly 15% live beneath 150% of the poverty line. Qualitative findings from this study show that, by far, the largest concern in terms of health and general well-being is for the elderly, especially those who are isolated in the most rural parts of the county.

The ACS analysis shows that elderly inpatients in 2014 were much more likely to be diagnosed with an ACS condition than younger patients as displayed in Table 31: UH Portage Medical Center: Most Common ACS Conditions, 2014, Seniors Versus Younger Adults (Primary Diagnosis, Adult, Non-Maternity Inpatients Only). This suggests a weaker primary care preventive network for older patients. While focus group participants were more likely to voice concern about the lack of specialist physicians in Portage County, they were also very likely to report “losses” of their primary care physician (usually through death), difficulty in finding a new primary care physician and/or the need to wait several weeks to obtain an initial appointment with an unfamiliar primary care physician. Therefore, both quantitative and qualitative data suggest a real shortage of primary care physicians in Portage County, and this appears to be related to a higher-than-normal level of hospitalizations for older citizens.

CONCLUSIONS

A. Priority Health Needs

Poor health status can result in a complex interaction of challenging social, economic, environmental and behavioral factors, combined with a lack of access to care, perceived or actually present. Addressing the more common “root” causes of poor community health can serve to improve a community’s quality of life and to reduce mortality and morbidity. Figure 11 (below) describes the community health needs identified through the 2016 CHNA as priorities. Those needs that the hospital plans to help address during 2016 through 2018, at least in part, are noted. After careful analysis of both qualitative and quantitative data, UH Portage Medical Center identified several broad priority health needs that impact the community served by the hospital. They are:

- Services for the elderly
- Services for lower income populations
- Access to primary care and specialists
- Obesity/access to healthy food
- Heart disease/stroke
- Substance abuse

There are several nuances to the identified priorities. For example, the data revealed significant levels of poverty for certain subsets of the population such as single-female-headed households with small children and place-based areas such as “Windham.” Additionally, “access to primary care” had more to do with the distribution of physicians, reducing the rate of preventable hospitalizations, the need for more engagement with targeted audiences, and health illiteracy and unhealthy habits of individuals than the fact that there are not enough physicians to meet the need. There was also significant discussion about the use of mobile integrated health and other advancements in service delivery that can be leveraged to address this need. Lastly, “access to healthy food” was combined with “obesity” because the anticipated strategies to meet this needs are aligned.

All the needs identified in the 2016 CHNA are addressed, in one way or another, by UH Portage Medical Center. However, herein we pinpoint those issues for which the hospital is in the best position to impact the greatest number of community members with the greatest level of need. Below we repeat all health issues identified by the 2016 CHNA and denote those issues that UH Portage Medical Center will proactively address in its 2016 – 2018 CHNA Implementation Strategy. Those denoted as “no” are and will continue to be addressed by numerous programs offered by the hospital. Those denoted as “yes” are the areas toward which new and/or additional hospital resources will be dedicated from 2016 to 2018.

Please note that “Health Literacy/Knowledge of Resources,” “Mental Health,” and “Access/Awareness of Healthy Foods” are encapsulated in the broader categories identified above, although not listed as current standalone priorities for this period.

The list that follows describes the priority health issues identified through this CHNA.

</tbody>
</table>

Please note that “Health Literacy/Knowledge of Resources,” “Mental Health,” and “Access/Awareness of Healthy Foods” are encapsulated in the broader categories identified above, although not listed as current standalone priorities for this period.
The 2016 – 2018 priorities were selected based on input from the broad interests of the community as well as data regarding hospital discharges and extensive data collection from secondary sources. This information was discussed and fully vetted with the UH Portage Medical Center core team by the Center for Health Affairs consultants assisting with the 2016 CHNA. The selection of needs, priorities and resources were determined via a facilitated discussion with UH staff and community stakeholders by the UH Director of Community Health Engagement. Participants included UH Portage Medical Center’s President, Outreach staff, Human Resources, and Ambulatory Care; staff from the UH EMS Institute and UH Marketing Department; and representatives from Kent State University, College of Nursing, Portage County Combined General Health District, Ravenna Fire Department, and the Mental Health Board of Portage County. The Score Sheet and Instructions can be found in Appendices E and F.

The broad priorities listed above were selected based on analysis of the quantitative and qualitative data in this report; the hospital’s ability to track outcomes; the hospital’s ability to leverage resources with partners and their congruence with countywide initiatives; the growth in the elderly population; the magnitude of health disparities; and the burden, scope and severity of the impact of the need on the community.

B. Resources Available to Address Priority Health Needs within the Community Served by the Hospital

UH Portage Medical Center works with numerous partners to address the needs identified in its 2016 CHNA. In addition to leveraging the resources of other UH hospitals, UH Portage Medical Center anticipates specifically working with the following organizations to address their 2016 – 2018 priorities:

- Axess Point (FQHC)
- Coleman Professional Services
- Family and Community Services, Inc.
- Portage County Fire Chiefs
- Portage County Health Department
- Portage County Police Chiefs Association
- Portage County Senior Center
- Primary Care Institute
- Veteran’s Services Commission
A. Qualifications of Consulting Company

The Center for Health Affairs is the leading advocate for Northeast Ohio hospitals. With a rich history as the Northeast Ohio hospital association, dating back to 1916, The Center serves as the collective voice of 36 hospitals spanning six counties.

The Center recognizes the importance of analyzing the top health needs in each community while ensuring hospitals are compliant with IRS regulations governing nonprofit hospitals. Since 2010, The Center has helped hospitals fulfill the CHNA requirements contained within the Affordable Care Act. The Center offers a variety of CHNA services to help hospitals produce robust and meaningful CHNA reports that can guide a hospital’s community health improvement activities. Beyond helping hospitals with the completion of timely CHNA reports, The Center spearheads the Northeast Ohio CHNA Roundtable, which brings member hospitals and other essential stakeholders together to spur opportunities for shared learning and collaboration in the region.

The 2016 CHNA prepared for UH Portage Medical Center was directed by The Center’s vice president of corporate communications and vice president of initiatives and analytics, managed by The Center’s community outreach director and supported by a project manager. More information about The Center for Health Affairs and its involvement in CHNAs can be found at www.chanet.org.

B. ACS Conditions and ICD-9-CM Codes

Below are the general categories of ACS conditions and their associated ICD-9-CM codes.

2. Immunization-Related and Preventable Conditions: ICD-9-CM codes 033, 037, 045, 390, 391; (also including haemophilus meningitis for children ages 1 – 5 only, ICD-9-CM code 320.0; ICD-10-CA code G00.0).
5. Severe ENT Infections: ICD-9-CM codes 382, 462, 463, 465, 472.1; (cases of otitis media, ICD-9-CM code 382).
7. Other Tuberculosis: ICD-9-CM codes 012-018.
9. Acute Bronchitis: (only included if a secondary diagnosis of COPD is also present, diagnosis codes as above), ICD-9-CM code 466.0.
10. Bacterial Pneumonia: ICD-9-CM codes 481, 482.2, 482.3, 482.9, 483, 485, 486; (patients with a secondary diagnosis of sickle-cell anemia, ICD-9-CM code 282.6; and patients less than two months of age are excluded).
13. Hypertension: ICD-9-CM codes 401.0, 401.9, 402.00, 402.10, 402.90.
14. Angina: ICD-9-CM codes 411.1, 411.8, 413 (patients with any surgical procedure coded are excluded).
15. Cellulitis: ICD-9-CM codes 681, 682, 683, 686 (patients with any surgical procedure coded are excluded, except for incisions of skin and subcutaneous tissue, ICD-9-CM procedure code 86.0).
23. Failure to Thrive: ICD-9-CM code 775.4; ICD-10-CA code R52 (patients less than one year of age only).
24. Pelvic Inflammatory Disease: ICD-9-CM code 614; ICD-10-CA codes N70, N73, N99.4 (female patients only, patients with a hysterectomy procedure coded are excluded, ICD-9-CM procedure codes 68.3 – 68.8).
C. 2016 CHNA Community Leader Interview Guide
Community Health Needs Assessment Survey Questions

Name: _______________________________________________________________________________
Organization: _________________________________________________________________________
Title: ________________________________________________________________________________
Date: ________________________________________________________________________________
Do we have your permission to list your name in the report? ________________________________

Questions:

1. Briefly describe the services your organization offers and the population you serve.

2. Are your services targeted toward a particular geographical area (city, ZIP code, school, etc.)? Are they countywide?

3. In your opinion, what is the biggest issue or concern facing the people served by your agency/in your community? In surrounding counties? Particular age groups (0 – 17, 18 – 44, 45 – 65, 65+)? (Note: If not health care related, what is biggest health care related issue or concern?)

4. Please share any trends seen in the following areas (and where, geographically, they are occurring):

   a. Demographic – changes in the size, age, racial/ethnic diversity or other characteristics of the population (particularly those who are “vulnerable”)

   b. Economic variables – their impact on health
c. Provider community – physicians, hospitals – who is taking care of the poor?

d. Health status/public health indicators (What illnesses/needs/issues are getting worse or better? Why?)

e. Access to care – why?

5. If residents are leaving the community to receive certain services, what services are not accessible locally? Why do residents need to travel for care? Are people entering the county for services? Why/from where? Particular age groups (0 – 17, 18 – 44, 45 – 65, 65+)?

6. Please discuss the kinds of problems that the people served by your agency (by community agencies) have in accessing health care, mental and behavioral health, and/or social services for themselves and/or their families? (Prompt: In answering this question, you may wish to consider the following problems: language barriers, transportation, no health insurance, lack of information on available resources, delays in getting needed care, economic constraints, and/or dissatisfaction with treatment.)

7. What are the community organizations/assets that are or could be working to address these needs?

8. Is there capacity within your organization to serve additional clients? If not, what are the biggest barrier(s) impacting your ability to increase capacity?
9. What role do you see the hospital(s) in your area currently playing to help address the community health issues faced by the low-income people who live here? What role do you think the hospitals in your area should play?

10. If resources were not a concern, what specific initiative(s) would you recommend to address the most pressing access or health status problems in the community? Why?
2015 Portage County
Children’s Health Survey

Answers Will Remain Confidential!

We need your help! We are asking you to complete this survey and return it to us within the
next 7 days. We have enclosed a $2.00 bill as a “thank you” for your time. We have also enclosed
a postage-paid envelope for your convenience.

This health survey is being sponsored by Portage County Health Department, Kent City Health
Department, and The Center for Health Affairs. If you have any questions or concerns, please
contact Karen Towne, at 330-296-9919 or email her at ktowne@portageco.com.

You have been randomly selected to complete this survey on your child who is
0-5 years of age who is living with you. If you have more than one child in this age group living with
you, please use the child whose birthday comes next in the calendar.

If you do not have a child 0-5 years of age living with you but do have a child 6-11
years of age living with you, please check here □ and complete the survey based
on this child. If you have more than one child in this age group living with you, please use the child whose birthday
comes next in the calendar.

If you do not have a child in either of the above age ranges, please check here □ and
return the blank survey in the postage-paid return envelope. Provide your name in
order to be removed from the list: _____________________________________

Instructions:

➢ Please complete the survey now rather than later.
➢ Please do NOT put your name on the survey. Your responses to this survey will be kept
  confidential. No one will be able to link your identity to your survey.
➢ Please be completely honest as you answer each question.
➢ Answer each question by selecting the response that best describes you or your child.

Thank you for your assistance. Your responses will help to make Portage County a healthier place
for all of our residents.

If you would prefer to take the survey online, you can scan the QR code or go to:

https://www.surveymonkey.com/s/

   - Grade 12 or GED (High school graduate)
   - College 1 year to 3 years (Some college or technical school)
   - College graduate
   - Post graduate education (Masters or Doctorate degree)

80. Is there a parent in the home who is in active military duty?
   - Yes
   - No

Thank you for your time and opinions!

Please fold your completed survey in half and place in the pre-stamped and addressed envelope provided and mail today!

If you include your name on the return envelope, we will remove you from the mailing list and you will not receive any additional information.
2015 Portage County
Children’s Health Survey

Answers Will Remain Confidential!

We need your help! We are asking you to complete this survey and return it to us within the next 7 days. We have enclosed a $2.00 bill as a “thank you” for your time. We have also enclosed a postage-paid envelope for your convenience.

This health survey is being sponsored by Portage County Health Department, Kent City Health Department, and The Center for Health Affairs. If you have any questions or concerns, please contact Karen Towne, at 330-296-9919 or email her at ktowne@portageco.com.

You have been randomly selected to complete this survey on your child who is 6-11 years of age who is living with you. If you have more than one child in this age group living with you, please use the child whose birthday comes next in the calendar.

If you do not have a child 6-11 years of age living with you but do have a child 0-5 years of age living with you, please check here □ and complete the survey based on this child. If you have more than one child in this age group living with you, please use the child whose birthday comes next in the calendar.

If you do not have a child in either of the above age ranges, please check here □ and return the blank survey in the postage-paid return envelope. Provide your name in order to be removed from the list: ____________________________________

Instructions:
➢ Please complete the survey now rather than later.
➢ Please do NOT put your name on the survey. Your responses to this survey will be kept confidential. No one will be able to link your identity to your survey.
➢ Please be completely honest as you answer each question.
➢ Answer each question by selecting the response that best describes you or your child.

Thank you for your assistance. Your responses will help to make Portage County a healthier place for all of our residents.

If you would prefer to take the survey online, you can scan the QR code or go to:

78. Is your gross annual household income from all sources…
   - Less than $10,000
   - $10,000 to $14,999
   - $15,000 to $19,999
   - $20,000 to $24,999
   - $25,000 to $34,999
   - $35,000 to $49,999
   - $50,000 to $74,999
   - $75,000 to $99,999
   - $100,000 or more

79. What is the highest grade or level of education attained by anyone in your household?
   - Never attended school or only attended kindergarten
   - Grades 1 through 8 (Elementary)
   - Grades 9 through 11 (Some high school)
   - Grade 12 or GED (High school graduate)
   - College 1 year to 3 years (Some college or technical school)
   - College graduate
   - Post graduate education (Masters or Doctorate degree)

80. Is there a parent in the home who is in active military duty?
   - Yes
   - No

Thank you for your time and opinions!

Please fold your completed survey in half and place in the pre-stamped and addressed envelope provided and mail today!

If you include your name on the return envelope, we will remove you from the mailing list and you will not receive any additional information.
2015 Portage County Youth Health Needs Questionnaire

Directions: Please listen to the instructions of the leader. Do NOT put your name on this survey. This survey asks you about your health and things you do in your life that affect your health. The information you give us will be used to develop better health education and services for people your age. The answers you give will be kept private. No one will know what you write. Answer the questions based on what you really do.

Completing the survey is voluntary. Whether or not you answer the questions will not affect your grade in this class. If you are not comfortable answering a question, just leave it blank. The questions that ask about your background will be used only to describe the types of students completing this survey. The information will not be used to find out your name. No names will ever be reported.

Please read and answer each question carefully. Please pick the letter of the answer that best describes you and your views. Circle the letter next to the best answer on your survey. The questions are out of order so that anyone who sees your survey cannot tell what you answered. No one will know what you write, but you must be honest. If you feel you can’t be honest, please DO NOT answer the question at all. Just leave it blank. When you are done with the survey, fold it and place it in the brown envelope at the front of the class. Thank you for doing your best on this!

### Information About You

1. How old are you?
   - 12 years old or younger ........................... A
   - 13 years old ........................................ B
   - 14 years old ......................................... C
   - 15 years old ......................................... D
   - 16 years old ......................................... E
   - 17 years old ......................................... F
   - 18 years old or older ............................... G

2. What is your gender?
   - Female ............................................... A
   - Male .................................................. B

3. In what grade are you?
   - 6th grade ............................................ A
   - 7th grade ............................................. B
   - 8th grade ............................................ C
   - 9th grade ............................................ D
   - 10th grade .......................................... E
   - 11th grade .......................................... F
   - 12th grade .......................................... G

4. How do you describe yourself? (CIRCLE ONE OR MORE RESPONSES)
   - American Indian/Alaska Native .................. A
   - Asian .................................................. B
   - Black or African American ....................... C
   - Hispanic or Latino ................................ D
   - Native Hawaiian or Other Pacific Islander .... E
   - White .................................................. F
   - Other .................................................. G

5. Do you live with…?
   - Both of your parents ................................ A
   - One of your parents ................................ B
   - Mother and step-father ............................. C
   - Father and step-mother ............................ D
   - Mother and partner ................................ E

   Cyber bullied (e.g., teased, taunted, or threatened by e-mail, cell phone, or other electronic methods) D
   Sexually bullied (e.g., using nude or semi-nude pictures to pressure someone to have sex that does not want to, blackmail, intimidate, or exploit another person) E
   None of the above                                                          F

22. During the past 12 months, have you ever been bullied on school property?
   Yes                             A
   No                              B

23. During the past 12 months, how many times did you do something to purposely hurt yourself without wanting to die, such as cutting or burning yourself on purpose?
   0 times                                                                      A
   1 time                                                                       B
   2 or 3 times                                                                 C
   4 or 5 times                                                                 D
   6 or more times                                                            E

24. During the past 12 months, have you ever been the victim of teasing or name calling because of any of the following? (CIRCLE ALL THAT APPLY)
   Your weight, size, or physical appearance                                        A
   Your gender                                                                     B
   Your race or ethnic background                                                   C
   Because someone thought you were gay, lesbian or bisexual                          D

Mental Health
25. During the past 12 months, did you ever feel so sad or hopeless almost every day for two weeks or more in a row that you stopped doing some usual activities?
   Yes                                                                             A
   No                                                                              B

26. During the past 12 months, did you ever seriously consider attempting suicide?
   Yes                                                                            A
   No                                                                             B

27. During the past 12 months, how many times did you actually attempt suicide?
   0 times                                                                      A
   1 time                                                                       B
   2 or 3 times                                                                 C
   4 or 5 times                                                                 D
   6 or more times                                                            E

28. If you attempted suicide during the past 12 months, did any attempt result in an injury, poisoning, or overdose that had to be treated by a doctor or nurse?
   I did not attempt suicide during the past 12 months                  A
   Yes                                                                           B
   No                                                                            C

29. What would keep you from seeking help if you were dealing with anxiety, stress, depression or thoughts of suicide? (CIRCLE ALL THAT APPLY)
   I would seek help,                                                           A
   Paying for it                                                             B
   Transportation                                                             C
   No Time                                                                     D
   Worried what others might think                                            E
   Family would not support me in getting help                                 F
   I can handle it myself                                                       G
   Do not know where to go                                                      H

30. How do you deal with anxiety, stress, or depression? (CIRCLE ALL THAT APPLY)
   I do not have anxiety, stress, or depression                                 A
   Talk to someone in my family                                               B
   Talk to a peer                                                             C
   Exercise                                                                    D
   Eat                                                                          E
   Drink alcohol                                                               F
   Smoke/use tobacco                                                           G
   Use illegal drugs                                                           H

- Snus
- Hookah
- E-cigarette (blu, NJOY, Starbuzz, Vaporizer, PV, e-hookah, hookah pens, vape pipes)
- Dissolvable tobacco products (Aria, Camel Orbs, Camel Sticks, Camel Strips, Stonewall)
- Other
- None

Alcohol Consumption

37. During your life, how many days have you had at least one drink of alcohol?

- 0 days
- 1 or 2 days
- 3 to 9 days
- 10 to 19 days
- 20 to 39 days
- 40 to 99 days
- 100 or more days
38. How old were you when you had your first drink of alcohol other than a few sips?
   I have never had a drink of alcohol, other than a few sips............A
   8 years old or younger........................................B
   9 years old.....................................................C
   10 years old....................................................D
   11 years old....................................................E
   12 years old....................................................F
   13 years old....................................................G
   14 years old....................................................H
   15 years old....................................................I
   16 years old....................................................J
   17 years old or older..........................................K

39. During the past 30 days, on how many days did you have at least one drink of alcohol?
   0 days..........................................................A
   1 or 2 days.......................................................B
   3 to 5 days.......................................................C
   6 to 9 days.......................................................D
   10 to 19 days......................................................E
   20 to 29 days.....................................................F
   All 30 days.......................................................G

40. During the past 30 days, on how many days did you have 5 or more drinks of alcohol in a row, that is, within a couple of hours?
   0 days..........................................................A
   1 day............................................................B
   2 days...........................................................C
   3 to 5 days.......................................................D
   6 to 9 days.......................................................E
   10 to 19 days......................................................F
   20 days or more................................................G

41. During the past 30 days, how did you usually get your alcohol? (CIRCLE ALL THAT APPLY)
   I did not drink during the past 30 days..............A
   I bought it in a store such as a liquor store, convenience store, supermarket, discount store or gas station........B

   I gave someone else money to buy it for me............H
   My parent gave it to me......................................I
   My friend’s parent gave it to me.............................J
   I took it from a store or family member................K
   I bought it with a fake ID....................................L
   I got it some other way......................................M

Drug Use

42. During the past 30 days, how many times did you use marijuana?
   0 times..........................................................A
   1 or 2 times.......................................................B
   3 to 9 times.......................................................C
   10 to 19 times......................................................D
   20 to 39 times.....................................................E
   40 or more times................................................F

43. During your life, how many times have you used any form of cocaine, including powder, crack, or freebase?
   0 times..........................................................A
   1 or 2 times.......................................................B
   3 to 9 times.......................................................C
   10 to 19 times......................................................D
   20 to 39 times.....................................................E
   40 or more times................................................F

44. During your life, how many times have you sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high?
   0 times..........................................................A
   1 or 2 times.......................................................B
   3 to 9 times.......................................................C
   10 to 19 times......................................................D
   20 to 39 times.....................................................E
   40 or more times................................................F

45. During your life, how many times have you used heroin (also called smack, junk, or China White)?
   0 times..........................................................A
   1 or 2 times.......................................................B
   3 to 9 times.......................................................C
   10 to 19 times......................................................D
   20 to 39 times.....................................................E
   40 or more times................................................F

46. During your life, how many times have you used methamphetamines (also called speed, crystal, crack or ice)?
   0 times..........................................................A
   1 or 2 times.......................................................B
   3 to 9 times.......................................................C
   10 to 19 times......................................................D
   20 to 39 times.....................................................E
   40 or more times................................................F

47. During your life, how many times have you taken steroid pills or shots without a doctor’s prescription?
   0 times..........................................................A
   1 or 2 times.......................................................B
   3 to 9 times.......................................................C
   10 to 19 times......................................................D
   20 to 39 times.....................................................E
   40 or more times................................................F
48. During your life, how many times have you used medications that were either not prescribed for you, or took more than was prescribed to feel good or high? (Examples include Oxycontin, Vicodin, Adderall, Concerta or Ritalin)

0 times
1 or 2 times
3 to 9 times
10 to 19 times
20 to 39 times
40 or more times

49. During your life, have you tried any of the following? (CIRCLE ALL THAT APPLY)

Ecstasy/MDMA/Molly
Over-the-counter medications (to get high)
A pharmparty/skittles
GhB
Bath salts
K2/spice

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Synthetic drugs (ex., K2, spice, etc.)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Heroin</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

53. Have you ever participated in the following? (CIRCLE ALL THAT APPLY)

Sexual Intercourse
Oral Sex
Anal Sex
Sexting (pictures and/or words)
View pornography
None of the above

54. How old were you when you had sexual intercourse for the first time?

11 years old or younger
12 years old
13 years old
14 years old
15 years old
16 years old
17 years old or older
I have never had sexual intercourse

55. During your life, with how many people have you had sexual intercourse?

1 person
2 people
3 people
4 people
5 people
6 or more people
I have never had sexual intercourse

56. The last time you had sexual intercourse, what one method did you or your partner use to prevent pregnancy? (CIRCLE ALL THAT APPLY)

I have never had sexual intercourse
No method was used to prevent pregnancy
Birth control pills
Condoms
A shot (such as Depo-Provera), patch (such as Ortho Evra), or birth control ring (such as NuvaRing)
An IUD (such as Mirena or ParaGard) or implant (such as Implanon or Nexplanon)
Withdrawal
I am gay or lesbian
Some other method
Not sure

57. Have you ever…? (CIRCLE ALL THAT APPLY)

Been pregnant
Gotten someone pregnant
Wanted to get pregnant
Had an abortion
Had a miscarriage
Had a child
Been treated for an STD
Had sex in exchange for something of value, such as food, drugs, shelter or money
None of the above
58. Where have you been taught about pregnancy prevention, sexually transmitted diseases, AIDS or HIV infection, or the use of condoms? (CIRC_ILL ALL THAT APPLY)
   School .............................................. A
   My doctor ......................................... B
   Parents .............................................. C
   Friends .............................................. D
   Siblings (brothers/sisters) ...................... E
   Church ................................................ F
   Internet or other social media .................. G
   Somewhere else ..................................... H
   Have not been taught about these subjects ...... I

---

59. How do you describe your weight?
   Very underweight .................................. A
   Slightly underweight ............................... B
   About the right weight ............................ C
   Slightly overweight ................................ D
   Very overweight .................................... E

60. Which of the following are you trying to do about your weight?
   Lose weight ........................................ A
   Gain weight ......................................... B
   Stay the same weight .............................. C
   I am not trying to do anything about my weight ........................................ D

61. During the past 30 days, did you do any of the following to lose weight or keep from gaining weight? (CIRC_ILL ALL THAT APPLY)
   I did not do anything to lose weight or keep from gaining weight ............. A
   Eat less food, fewer calories, or foods low in fat ........................................ B
   Eat more fruits and vegetables ................................................................. C
   Drink more water ................................................... D

- Someone at least 5 years older than you or an adult, forced you to have sex, .................................L
- None of the above has happened to me, ..................................................M

74. How tall are you without your shoes on?

_________________ Feet
_________________ Inches

75. How much do you weigh without your shoes on?

_________________ Pounds

Thank you for giving us your opinions!

2015 Portage County Health Survey

Answers Will Remain Confidential!

We need your help! We are asking you to complete this survey and return it to us within the next 7 days. We have enclosed a $2.00 bill as a “thank you” for your time. We have also enclosed a postage-paid envelope for your convenience.

This health survey is being sponsored by Portage County Health Department, Kent City Health Department and The Center for Health Affairs. If you have any questions or concerns, please contact Karen Towne, at 330-296-9919 or email her at ktowne@portageco.com.

Instructions:

➢ Please complete the survey now rather than later.

➢ Please do NOT put your name on the survey. Your responses to this survey will be kept confidential. No one will be able to link your identity to your survey.

➢ Please be completely honest as you answer each question.

➢ Answer each question by selecting the response that best describes you.

Thank you for your assistance. Your responses will help to make Portage County a healthier place for all of our residents.

If you would prefer to take the survey online, you can scan the QR code or go to: https://www.surveymonkey.com/s/2015

Turn the page to start the survey ➔
1. Would you say that in general your health is:
   - Excellent
   - Very good
   - Good
   - Fair
   - Poor

2. Now thinking about your physical health, which includes physical illness and injury, for how many days during the past 30 days was your physical health not good?
   - Number of days ________________
   - None
   - Don’t know

   - Yes, only one
   - More than one
   - No
   - Don’t know

6. What is the main reason you do not have a usual source of medical care?
   - I do have a usual source of medical care
   - Two or more usual places
   - Have not needed a doctor
   - Do not like/trust/believe in doctors
   - Do not know where to go
   - Previous doctor is unavailable/has moved
   - No insurance
   - Can’t afford
   - Speak a different language
   - No place is available/close enough
   - Not accepting new patients
   - Not accepting Medicare or Medicaid/Health Care Exchange
   - Outstanding bill
   - Other: __________________________
   - Don’t know

7. From which resource do you get local news and health information? (CHECK ALL THAT APPLY)
   - Record Courier newspaper
   - Record Courier online
   - Aurora Advocate
   - Gateway News
   - The Villager
   - Akron Beacon Journal newspaper
   - WKSU radio station
   - WNIR radio station
   - Billboards
   - Facebook, Twitter, or other social media
   - School district
   - Place of worship
   - Family member/friend
   - My doctor/health care provider
   - Local television news station (WKYC, Fox 8, WOIO, WEWS)
   - Websites
   - Health fairs/community events
   - Texts on cell phone
   - Mailings
   - Other: __________________________
   - Don’t know

8. What might prevent you from seeing a doctor if you were sick, injured, or needed some type of health care? (CHECK ALL THAT APPLY)
   - Nothing would prevent me
   - Cost
   - Frightened of the procedure or doctor
   - Worried they might find something wrong
   - Cannot get time off from work
   - Hours not convenient
   - Difficult to get an appointment
   - Do not trust or believe doctors
   - No transportation or difficult to find transportation
   - Some other reason

9. What transportation issues do you have when you need services? (CHECK ALL THAT APPLY)
   - No car
   - No driver’s license
   - Cannot afford gas
   - Disabled
   - Car does not work
   - No car insurance
   - Other car issues/expenses
   - Limited public transportation available or accessible
   - No transportation before or after 8:00 a.m.-4:30 p.m. hours
   - No public transportation available or accessible
   - I do not have any transportation issues
10. Was there a time in the past 12 months when you needed to see a doctor but could not because of cost?
- Yes
- No
- Don’t know

11. Do you have any kind of health coverage, including health insurance, prepaid plans such as HMO’s, or governmental plans such as Medicare?
- Yes
- No – GO TO QUESTION 14
- Don’t know

12. What type of health care coverage do you use to pay for most of your medical care?
- Your employer
- Someone else’s employer
- A plan that you or someone else buys on your own
- Medicare
- Medicaid or Medical Assistance
- The military, CHAMPUS, TriCare, CHAMPVA or the VA
- The Indian Health Service
- Health Insurance Marketplace (Obamacare)
- Workers compensation
- Social security/Disability
- Some other source
- None
- Don’t know

13. Does your health coverage include:
- Medical?
- Dental?
- Vision?
- Mental health?
- Mental health counseling?
- Prescription coverage?
- Home care?
- Skilled nursing?
- Hospice?
- Preventive health?
- Your spouse?
- Your partner?
- Your children?
- Immunizations?
- Long term care?
- County physicians?
- Alcohol and drug treatment?
- Outpatient therapy (ex. occupational therapy, physical therapy)?
- Transportation?

14. What is the reason you are without health care coverage? (CHECK ALL THAT APPLY)
- Never without health care coverage
- Lost job or changed employers
- Spouse or parent lost job or changed employers
- Became divorced or separated
- Spouse or parent died
- Became ineligible (age or left school)
- Employer doesn’t/stopped offering coverage
- Became a part time or temporary employee
- Benefits from employer/former employer ran out
- Couldn’t afford to pay the premiums
- Insurance company refused coverage
- Lost Medicaid eligibility
- Unable to access the exchange
- Do not have the internet to access the exchange
- Confused about choices on Market Place (Obamacare)
- Cannot afford exchange premiums
- Other
- Don’t know

15. During the past 12 months, why did you not get a prescription from your doctor filled? (CHECK ALL THAT APPLY)
- I had all prescriptions filled
- I did not have any prescriptions to be filled
- I have no insurance
- I am taking too many medications
- I couldn’t afford to pay the out of pocket expenses
- My co-pays are too high
- My premiums are too high
- My deductibles are too high
- I have a high deductible with HSA account
- I opted out of prescription coverage because I couldn’t afford it
- There was no generic equivalent of what was prescribed
- I stretched my current prescription by taking less than what was prescribed
- Transportation
- Side effects
- I did not think I needed it
16. Have you had any of the following issues regarding your health care coverage? (CHECK ALL THAT APPLY)
- Co-pays are too high
- Premiums are too high
- Deductibles are too high
- High deductible with Health Savings Account (HSA)
- Opted out of certain coverage because I could not afford it
- Opted out of certain coverage because I did not need it
- I cannot understand my insurance plan
- Difficulty navigating the Marketplace
- Working with my insurance company
- Mental health services not covered or limited services
- Provider/facility is no longer covered
- Service is no longer covered
- Service is not deemed medically necessary
- Limited visits
- None of the above
- Don’t know

17. About how long has it been since you last visited a doctor for a routine checkup? A routine checkup is a general physical exam, not an exam for a specific injury, illness, or condition.
- Less than a year ago
- 1 to 2 years ago
- 2 to 5 years ago
- 5 or more years ago
- Never

18. Within the past 12 months, have you had any of the following problems when you needed health care? (CHECK ALL THAT APPLY)
- My healthcare plan does not allow me to see doctors in Portage County
- I had to change doctors because of my healthcare plan
- I couldn’t find a doctor to take me as a patient
- I couldn’t find a doctor that I am comfortable with
- I couldn’t get appointments when I want them
- I didn’t get health services because of discrimination
- I didn’t get health services because I was concerned about my confidentiality
- I didn’t have enough money to pay for health care
- I didn’t have insurance
- I didn’t have transportation
- I did not have anyone to watch my parent or senior family member
- I didn’t have anyone to take care of my children
- I was too busy to get the health care I needed
- I was too embarrassed to seek help
- I had another problem that kept me from getting health care: ___________________________
- I have not had any of these problems in the past 12 months

19. When you are sick or need advice about your health, to which one of the following places do you usually go?
- A doctor’s office
- A public health clinic or community health center
- A hospital outpatient department
- A hospital emergency room
- Urgent care center
- In-store health clinic (ex: CVS, Walmart, Walgreen’s, etc.)
- Internet
- VA
- Chiropractor
- Alternative therapies (ex: massage, hypnosis, acupuncture, etc.)
- Some other kind of place
- No usual place
- Don’t know

20. Have you looked for any of these types of programs for you or a loved one?

<table>
<thead>
<tr>
<th>Depression, anxiety, or some mental health problem?</th>
<th>☐ Yes, and I have found one</th>
<th>☐ Yes, and I have NOT found one</th>

</tbody>
</table>

21. What are your reasons for not using a program or service to help with depression, anxiety, or emotional problems for you or for a loved one?
- Have used a program or service
- Not needed
- Transportation
- Fear
- Co-pay/deductible is too high
- Cannot afford to go
- Cannot get to the office or clinic
- Don’t know how to find a program
- Stigma of seeking mental health services
- Didn’t feel the services you had received were good
- Other priorities
- Have not thought of it
- Other: ___________________________
- Don’t know
22. How long has it been since you last visited a dentist or a dental clinic for any reasons? Include visits to dental specialists, such as orthodontists.
   - Within the past year (anytime less than 12 months ago) – **GO TO QUESTION 24**
   - Within the past 2 years (1 year but less than 2 years ago)
   - Within the past 5 years (2 years but less than 5 years ago)
   - 5 or more years ago
   - Don’t know/Not sure
   - Never

23. What is the main reason you have not visited the dentist in the last year?
   - Fear, apprehension, nervousness, pain, dislike going
   - Cost
   - I cannot get into a dentist
   - My dentist does not accept my medical coverage
   - Cannot find a dentist that takes Medicaid
   - Do not have/ know a dentist
   - Cannot get to the office/clinic (too far away, no transportation no appointments available)
   - Cannot find a dentist that treats special needs clients
   - No reason to go (no problems, no teeth)
   - Other priorities
   - Have not thought of it
   - Other: __________________________
   - Don’t know

24. How many of your permanent teeth have been removed because of tooth decay or gum disease? Include teeth lost to infection, but do not include teeth lost for other reasons, such as injury or orthodontics.
   - 5 or fewer
   - 6 or more but not all
   - All
   - None
   - Don’t know

25. During the past 30 days, how many days per month did you have at least one drink of any alcoholic beverage such as beer, wine, a malt beverage or liquor?
   - Days per month __________
   - No drinks in past 30 days – **GO TO QUESTION 29**
   - Don’t know

26. One drink is equivalent to a 12-ounce beer, a 5-ounce glass of wine, or a drink with 1 shot of liquor. During the past 30 days, on the days when you drank, about how many drinks did you drink on the average?
   - Number of drinks __________
   - Don’t know

27. Considering all types of alcoholic beverages, how many times during the past 30 days did you have (for males) 5 or more drinks on an occasion, or (for females) 4 or more drinks on an occasion?
   - Number of times __________
   - None
   - Don’t know

28. During the past month, how many times have you driven when you’ve had perhaps too much to drink?
   - Number of times __________
   - None
   - Don’t know

29. During the past six months, have you or a family member experienced any of the following? (CHECK ALL THAT APPLY)
   - Had to drink more to get same effect
   - Drank more than you expected
   - Gave up other activities to drink
   - Spent a lot of time drinking
   - Tried to quit or cut down (but couldn’t)
   - Continued to drink despite problems caused by drinking
   - Drank to ease withdrawal symptoms
   - Failed to fulfill duties at work, home, or school
   - None of the above
   - Don’t know

30. What are your reasons for not seeking a program or service to help with alcohol problems for you or a loved one? (CHECK ALL THAT APPLY)
   - Have used a program or service
   - Not needed
   - Transportation
   - Fear
   - Cannot afford to go
   - Cannot get to the office or clinic
   - Don’t know how to find a program
   - Stigma of seeking alcohol services
   - Do not want to miss work
   - Have not thought of it
   - Other: __________________________

- Tranquilizers such as Valium or Xanax, sleeping pills, barbiturates, Seconal, Ativan or Klonopin
- Suboxone or Methadone
- Neurontin
- Steroids
- Ritalin, Adderall, Concerta or other ADHD medications
- I have not used any of these medications in the past six months – 

56. How frequently have you misused the medications checked in question 55 during the past six months?
- Almost every day
- 3 to 4 days a week
- 1 or 2 days a week
- 1 to 3 days a month
- Less than once a month
- I have not misused any of these medications during the past six months
- Don’t know/Not sure

57. How did you obtain these medications? (CHECK ALL THAT APPLY)
- From my primary care physician
- From multiple doctors
- From an ER or urgent care doctor
- Free from a friend or family member
- Bought from a friend or family member
- Stole from a friend or family member
- Bought from a drug dealer
- I have not used any of these medications during the past six months
- Don’t know/Not sure

58. During the past six months, have you ever taken any of the following over-the-counter drugs in a way that was not intended? (CHECK ALL THAT APPLY)
- Cold and cough medicines, such as Nyquil, Robitussin, Coricidin, Pseudoephedrine
- Weight loss or diet pills
- Sleeping pills such as Tylenol PM, Unisom
- Motion sickness pills such as Dramamine
- Energy boosters such as Vivarin, Stackers
- Other: _____________________________
- None of the above

59. A mammogram is an x-ray of each breast to look for breast cancer. When was your last mammogram?
- Have never had a mammogram
- Within the past year
- Within the past 2 years (1 year but less than 2 years ago)
- Within the past 3 years (2 years but less than 3 years ago)
- Within the past 5 years (3 years but less than 5 years ago)
- 5 or more years ago
- Breasts were removed
- Don’t know
60. A clinical breast exam is when a doctor, nurse, or other health professional feels the breast for lumps. When was your last breast exam?
- Have never had a breast exam
- Within the past year
- Within the past 2 years (1 year but less than 2 years ago)
- Within the past 3 years (2 years but less than 3 years ago)
- Within the past 5 years (3 years but less than 5 years ago)
- 5 or more years ago
- Breasts were removed
- Don’t know

61. A Pap smear is a test for cancer of the cervix. How long has it been since you had your last Pap smear?
- Have never had a Pap smear
- Within the past year
- Within the past 2 years (1 year but less than 2 years ago)
- Within the past 3 years (2 years but less than 3 years ago)
- Within the past 5 years (3 years but less than 5 years ago)
- 5 or more years ago
- Don’t know

62. If you have been pregnant in the past 5 years, during your last pregnancy, did you… (CHECK ALL THAT APPLY)
- I was not pregnant in the past 5 years
- Get prenatal care within the first 3 months
- Take a multi-vitamin
- Take folic acid pre-pregnancy
- Take folic acid during pregnancy
- Smoke cigarettes
- Use other tobacco products
- Use e-cigarettes
- Consume alcoholic beverages
- Use marijuana
- Use any drugs not prescribed
- Use opioids
- Experience perinatal depression (during or after pregnancy)

- Received services at a pregnancy resource/crisis intervention center
- Look for options for an unwanted pregnancy
- Have an abortion
- Give up child for adoption
- Received opiate replacement therapy (ex. suboxone)
- Do none of these things

63. A Prostate-Specific Antigen test, also called a PSA test, is a blood test used to check men for prostate cancer. When was your last PSA test?
- Have never had a PSA test
- Within the past year
- Within the past 2 years (1 year but less than 2 years ago)
- Within the past 3 years (2 years but less than 3 years ago)
- Within the past 5 years (3 years but less than 5 years ago)
- 5 or more years ago
- Don’t know

64. A digital rectal exam is an exam in which a doctor, nurse, or other health professional places a gloved finger into the rectum to feel the size, shape, and hardness of the prostate gland. When was your last digital rectal exam?
- Have never had a digital rectal exam
- Within the past year
- Within the past 2 years (1 year but less than 2 years ago)
- Within the past 3 years (2 years but less than 3 years ago)
- Within the past 5 years (3 years but less than 5 years ago)
- 5 or more years ago
- Don’t know

65. During the past 12 months, with how many different people have you had sexual intercourse?
- Number of people
- Don’t know
- Have not had intercourse in past 12 months

66. Have you been tested for any of the following sexually transmitted diseases (STDs) in the past 2 years?
- Chlamydia
- Gonorrhea
- Genital herpes
- Syphilis
- Human Papilloma Virus (HPV)
- Hepatitis C
- HIV/AIDS
- Other STDs
- None of the above
- Don’t know
67. What are you or your partner doing now to keep from getting pregnant? (CHECK ALL THAT APPLY)

- No partner/not sexually active (abstinent) – GO TO QUESTION 69
- Not currently using birth control
- My partner and I are trying to get pregnant
- I am gay or a lesbian
- Tubes tied (female sterilization)
- Hysterectomy (female sterilization)
- Vasectomy (male sterilization)
- Pill, all kinds (Ortho Tri-Cyclen, etc.)
- IUD (including Mirena)
- Condoms (male or female)
- Contraceptive implants (Implanon or implants)
- Diaphragm, cervical ring or cap (Nuvaring or others)
- Shots (Depo-Provera, etc.)
- Contraceptive Patch
- Emergency contraception (EC)
- Withdrawal
- Having sex only at certain times (rhythm)
- My partner or myself is too old
- My partner or myself is infertile
- Other method (foam, jelly, cream, etc.)
- Don’t know/Not sure

68. What is the main reason for not doing anything to keep from getting pregnant? (CHECK ALL THAT APPLY)

- I am using a birth control method
- Didn’t think I was going to have sex/no regular partner
- I want to get pregnant
- I am gay or a lesbian
- I do not want to use birth control
- My partner does not want to use any
- My partner or I don’t like birth control/fear side effects
- I don’t think my partner or I can get pregnant
- I cannot pay for birth control
- I had a problem getting birth control when I needed it
- My partner or I had a hysterectomy/vasectomy/tubes tied
- My partner or I am too old (menopausal)
- Lapse in use of method
- My partner or I am currently breast-feeding
- My partner or I just had a baby/postpartum
- My partner or I am pregnant now
- Don’t care if you or your partner gets pregnant
- Religious preferences
- Don’t know

69. Have you ever been forced to participate in sexual activity when you didn’t want to?

- Yes
- Yes, and I reported it
- Yes, and I did not report it
- No

70. During the past 30 days, did you do any of the following to lose weight or keep from gaining weight? (CHECK ALL THAT APPLY)

- I did not do anything to lose weight or keep from gaining weight
- Eat less food, fewer calories, or foods low in fat, or low carb diet
- Eat a low-carb diet
- Exercise
- Go without eating for 24 hours
- Take any diet pills, powders, or liquids without a doctor’s advice
- Vomit after eating
- Take laxatives
- Smoke cigarettes
- Bariatric surgery
- Use a weight loss program such as Weight Watchers, Jenny Craig, etc.
- Participate in a dietary or fitness program prescribed for you by a health professional
- Take medications prescribed by a health professional
- Health coaching

71. On average how many servings of fruits and vegetables do you have per day?

- 1 to 2 servings per day
- 3 to 4 servings per day
- 5 or more servings per day
- 0 – I do not like fruits or vegetables
- 0 – I cannot afford fruits or vegetables
- 0 – I do not have access to fruits or vegetables

72. In a typical week, how many meals did you eat out in a restaurant or bring take-out food home to eat?

_____________ Meals

73. How often do you do vigorous activities for at least 20 minutes that cause heavy sweating or large increases in breathing or heart rate? Please fill in the days per week for both summer and winter.

Days per week in the summer time __________
Days per week in the winter time __________

- Unable to do this type of activity
- Don’t know

74. How often do you do light or moderate activities for at least 30 minutes that cause only light sweating or slight to moderate increases in breathing or heart rate? Please fill in the days per week for both summer and winter.

Days per week in the summer time __________
Days per week in the winter time __________

- Unable to do this type of activity
- Don’t know
75. What type of moderate physical activity or exercise did you spend the most time doing during the past year?
- I did not exercise
- Running/jogging
- Walking
- Cycling
- Exercise machines
- Exercise through my occupation
- Group exercise classes
- Swimming
- Strength training
- Active video games (i.e., Wii)
- Exercise videos (i.e., P90X)
- Other: ___________________________
- Unable to exercise

76. For what reasons do you not exercise? (CHECK ALL THAT APPLY)
- I do exercise
- Weather
- Time
- Cannot afford a gym membership
- Gym is not available
- No walking, biking trails, or parks
- Safety
- I do not have child care
- I do not know what activity to do
- Doctor advised me not to exercise
- Pain/discomfort
- I choose not to exercise
- I do not have an exercise partner
- Too tired
- Lazy
- No sidewalks or poorly maintained sidewalks
- Other: ___________________________

77. On an average day, how many hours do you spend doing the following activities?

<table>

78. Where do you purchase/obtain your fresh fruits and vegetables? (CHECK ALL THAT APPLY)
- Grow your own/garden
- Large grocery store (ex. Wal-Mart, Giant Eagle)
- Local grocery store (ex. Marc’s, Acme)
- Restaurants
- Farmer’s Market
- Food Pantry
- Consumer Supported Agricultural (CSA)
- Corner/convenience stores
- Other
- I do not purchase fruits and vegetables

79. What determines the types of food you eat? (CHECK ALL THAT APPLY)
- Cost
- Healthiness of food
- If it is genetically modified (GMO)
- If it is organic
- Calorie content
- Nutritional content (reading label)
- Taste
- Gluten-free
- Lactose-free
- Availability
- Enjoyment, it’s what I like
- Ease of preparation
- Time
- Food that I am used to
- What my spouse prefers
- What my child prefers
- Health care provider’s advice
- Other food sensitivities
- Other: ___________________________
- Don’t know

80. During the past 12 months, did you ever feel so sad or hopeless almost every day for two weeks or more in a row that you stopped doing some usual activities?
- Yes
- No

81. During the past 12 months, did you ever seriously consider attempting suicide?
- Yes
- No – GO TO QUESTION 83

82. During the past 12 months, how many times did you actually attempt suicide?
- 0 times
- 1 time
- 2 or 3 times
- 4 or 5 times
- 6 or more times
83. Have you or a family member ever been diagnosed or treated for a mental health issue? In the past 12 months, have you or a family member been diagnosed or treated for a mental health issue? (CHECK ALL THAT APPLY).

84. Where do you get the social and emotional support you need? (CHECK ALL THAT APPLY)
- I don't get the social and emotional support I need
- Friends
- Family
- Neighbors
- Internet
- Church
- Community
- A professional
- Self-help group
- Other: ____________________________

85. What would you do if you knew someone who was suicidal? (CHECK ALL THAT APPLY)
- Call 911
- Call a crisis line
- Take them to the ER
- Call a friend
- Talk to them
- Try to calm them down
- Nothing
- Other: ____________________________

86. What causes you anxiety, stress, or depression? (CHECK ALL THAT APPLY)
- Fighting in home
- Family member in military
- Unemployment
- Poverty/no money
- Marital/dating relationship
- Fighting with friends
- Alcohol or drug use in the home
- Death of close family member or friend
- Divorce/separation
- Family member is sick
- Caring for a parent
- Caring for someone with special needs
- Raising/caring for grandchildren
- Family member with a substance abuse problem
- Family member with a mental illness
- Not having a place to live
- Not feeling safe at home
- Job stress
- Financial stress
- Other stress at home
- Not feeling safe in the community
- Sexual orientation/gender identity
- Not having enough to eat
- Other: ____________________________
- None of the above

87. Are you limited in any way in any activities because physical, mental, or emotional problems?
- Yes
- No
- Don't know

88. Because of any impairment or health problem, do you need the help of other persons with any of the following needs? (CHECK ALL THAT APPLY)
- I am not limited by any impairments or health problems
- Eating
- Bathing
- Toileting
- Dressing
- Getting around the house
- Household chores
- Cooking
- Doing necessary business
- Yard work
- Shopping
- Bills
- Getting around for other purposes
- Transportation
- Child care
- None of the above
89. What major impairments or health problems limit your activities? (CHECK ALL THAT APPLY)
- I am not limited by any impairments or health problems
- Arthritis/rheumatism
- Back or neck problem
- Chronic pain
- Fractures, bone/joint injury
- Fitness level
- Walking problem
- Lung/breathing problem
- Hearing problem
- Eye/vision problem
- Heart problem
- Stroke-related problem
- Hypertension/high blood pressure
- Diabetes
- Cancer
- Stress/anxiety/depression/emotional problems
- Other mental health issue
- Tobacco dependency
- Alcohol dependency
- Drug addiction
- Learning disability
- Developmental disability (cognitive/intellectual)
- Mental health illness/disorder
- Sleep problems
- Incontinence
- Other impairment/problem

90. Are any firearms now kept in or around your home? Include those kept in a garage, outdoor storage area, car, truck, or other motor vehicle. (CHECK ALL THAT APPLY)
- Yes, and they are unlocked
- Yes, and they are loaded
- Yes, but they are not unlocked
- Yes, but they are not loaded
- No
- Don't know

91. In the past 30 days, have you needed help meeting your general daily needs such as food, clothing, shelter, or paying utility bills?
- Yes
- No
- Don't know

92. During the past 12 months, were you abused by any of the following? Include physical, sexual, emotional, financial and verbal abuse. (CHECK ALL THAT APPLY)
- A spouse or partner
- A parent
- Child
- Another person from outside the home
- Another family member living in your household
- Someone else
- I was not abused in the past 12 months – GO TO QUESTION 94

93. How were you abused? (CHECK ALL THAT APPLY)
- Physically abused
- Sexually abused
- Verbally abused
- Emotionally abused
- Financially abused
- Any of the above through electronic methods (such as texts, facebook, etc.)
- I was not abused in the past 12 months

94. What are your concerns in this community? (CHECK ALL THAT APPLY)
- Traffic
- Unemployment
- Underemployment
- School funding
- Lack of affordable housing
- Lack of affordable transportation
- Lack of affordable healthcare
- Lack of health education
- Cancer prevention screening
- Seat belt or restraint usage
- Falls
- Violence
- Speeding
- Chronic disease prevention
- Physical fitness opportunities
- Nutrition
- Healthy eating
- Hunger/food security
- Cooking
- Bicycle safety
- OVI (Operating a Vehicle Impaired)
- DUI (Driving Under the Influence)
- Distracted driving
- Bullying/cyberbullying
- Sexting
- Teen pregnancy
- Suicide prevention
- Alcohol abuse
- Tobacco use
- Illegal drug use
- Opiate/prescription drug abuse
- Youth substance abuse
- Parents hosting/allowing underage drinking
- Gambling
- Disaster preparedness
- Homelessness
- Senior/elder care
- Discrimination based on race/ethnicity, sexual orientation, etc.
- Other: ____________________________
- None of the above
- Don’t know
95. Do you do any of the following while driving? (CHECK ALL THAT APPLY)
- Wear your seatbelt
- Drive without a seatbelt
- Talk on hand-held cell phone
- Talk on hands-free cell phone
- Text
- Are under the influence of alcohol
- Are under the influence of recreational drugs
- Are under the influence of prescription drugs
- Read
- Eat
- Use Internet on cell phone
- Check facebook on cell phone
- Other (i.e., apply make-up, shave)
- I do not drive
- None of the above

96. The following problems are sometimes associated with poor health. In or around your household, which of the following do you think have threatened you or your family's health in the past year? (CHECK ALL THAT APPLY)
- Rodents (mice or rats)
- Insects (mosquitoes, ticks, flies)
- Bed bugs
- Cockroaches
- Lice
- Unsafe water supply/wells
- Plumbing problems
- Sewage/waste water problems
- Indoor air quality
- Outdoor air quality
- Temperature regulation (heating and air conditioning)
- Safety hazards (structural problems)
- Lead paint
- Chemicals found in household products (i.e. cleaning agents, pesticides, automotive products)
- Agricultural chemicals (i.e. pesticides, insecticides, fertilizers)
- Mold
- Moisture issues
- Sanitation issues
- Asbestos
- Radiation
- Fracking
- Radon
- Hazardous waste incidents, storage and transport
- Food safety/food-borne infections
- Excess medications in the home
- General living conditions
- None

97. What would be your main method or way of getting information from authorities in a large-scale disaster or emergency? (CHECK ALL THAT APPLY)
- Television
- Radio
- Internet
- Social media (ex. Facebook, Twitter, etc.)
- Newspaper
- Neighbors
- Friends/Family
- Local Emergency Alert System
- Portage Prepares
- Other:_____________________
- Don't know

98. Does your household have any of the following disaster/emergency supplies? (CHECK ALL THAT APPLY)
- 3-day supply of water for everyone who lives there (1 gallon of water per person per day)
- 3-day supply of nonperishable food for everyone who lives there
- 3-day supply of prescription medication for each person who takes prescribed medicines
- A working battery operated radio and working batteries
- A working flashlight and working batteries
- Cell phone
- Cell phone with texting
- Home land line telephone
- A working smoke detector
- Generator
- Disaster plan
- A family disaster plan
- Communication plan (ways to contact family and friends)
- None of the above
- Don't know

99. If public authorities announced a mandatory evacuation from your community due to a large-scale disaster or emergency, would you evacuate?  
- Yes
- No
- Don't know

100. What would be the main reason you might not evacuate if asked to do so?  
- Lack of transportation
- Lack of trust in public officials
- Concern about leaving property behind
- Concern about personal safety
- Concern about family safety
- Concern about leaving pets
- Concern about traffic jams and inability to get out
- Health problems (could not be moved)
- Other
- Don’t know
101. Did any of the following happen to you as a child (under the age of 18)? (CHECK ALL THAT APPLY)
- Lived with someone who was depressed, mentally ill or suicidal
- Lived with someone who was a problem drinker or alcoholic
- Lived with someone who used illegal street drugs, or who abused prescription medications
- Lived with someone who served time or was sentenced to serve time in a prison, jail, or other correctional facility
- Your parents became separated or were divorced
- Your parents were not married
- Your parents or adults in your home slapped, hit, kicked, punched or beat each other up
- A parent or adult in your home hit, beat, kicked, or physically hurt you in any way (not including spanking)
- A parent or adult in your home swore at you, insulted you, or put you down
- Someone at least 5 years older than you or an adult touched you sexually
- Someone at least 5 years older than you or an adult tried to make you touch them sexually
- Someone at least 5 years older than you or an adult, forced you to have sex
- None of the above has happened to me

102. What is your zip code? ________________

103. What is your age? ________

104. What is your gender?
- Male
- Female

105. What is your race?
- American Indian/Alaska Native
- Asian
- Black or African-American
- Native Hawaiian/Other Pacific Islander
- White
- Other: ________________________
- Don’t know

106. Are you Hispanic or Latino?
- Yes
- No
- Don’t know

107. Are you…
- Married
- Divorced
- Widowed
- Separated
- Never been married
- A member of an unmarried couple

108. How would you describe yourself?
- Heterosexual
- Gay
- Lesbian
- Bi-sexual
- Transgender
- Other

109. How many people live in your household who are…
- Less than 5 years old ________________
- 5 to 12 years old ________________
- 13 to 17 years old ________________
- Non-related adults ________________
- Adults (related) ________________

110. Describe your home: (CHECK ALL THAT APPLY)
- Rural – I live in the country
- I live in a village, town, or city
- Mobile home
- Apartment complex
- Duplex
- House that I rent
- House that I own
- I share my home with family or friends who have nowhere else to live
- Motel

111. What city, town, or township do you live in?
- City of Aurora
- City of Kent
- City of Ravenna
- City of Streetsboro
- City of Tallmadge
- Atwater Township
- Brimfield Township
- Charlestown Township
- Deerfield Township
- Edinburg Township
- Franklin Township
- Freedom Township
- Hiram Township
- Mantua Township
- Nelson Township
- Palmyra Township
- Paris Township
- Randolph Township
- Ravenna Township
- Rootstown Township
- Shalersville Township
- Suffield Township
- Windham Township
- Brady Lake Village
- Garrettsville Village
- Hiram Village
- Mantua Village
- Mogadore Village
- Sugar Bush Knolls Village
- Windham Village
112. What is the highest grade or year of school you completed?
- Never attended school or only attended kindergarten
- Grades 1 through 8 (Elementary)
- Grades 9 through 11 (Some high school)
- Grade 12 or GED (High school graduate)
- College 1 year to 3 years (Some college or technical school)
- College 4 years or more (College graduate)
- Post-graduate

113. Are you currently…
- Employed for wages full-time
- Employed for wages part-time
- Self-employed
- Out of work for more than 1 year
- Out of work for less than 1 year
- Homemaker
- Student
- Retired
- Unable to work

114. Is your annual household income from all sources…
- Less than $10,000
- $10,000 to $14,999
- $15,000 to $19,999
- $20,000 to $24,999
- $25,000 to $34,999
- $35,000 to $49,999
- $50,000 to $74,999
- $75,000 or more
- Don’t know

115. About how much do you weigh without shoes?
POUNDS ____________
- Don’t know

116. About how tall are you without shoes?
FEET ________________
INCHES ______________
- Don’t know

F. UH Portage Medical Center Prioritization
Background and Instructions

Below you will find a description of the assumptions and decisions that were made to develop the score sheet. These can be adjusted if necessary – they were provided as a starting point.

Identified Needs

The needs were populated based on discussions with the UH Portage Medical Center CHNA Team, President and consultants.

Criteria for Assessing Needs

Four criterion were selected by UH Government & Community Relations administrators based on a list of recommended items from the State of Ohio’s Health Assessment process. The full list was previously shared with the UH Portage Medical Center CHNA team.

Rating Scale

The rating scale has a range of 1 – 3, with 1 being less “favorable” and 3 being most “favorable.” The first two columns (criterion) require the use of the descriptors “Unlikely,” “Somewhat Likely” or “Very Likely.” The next two columns (criterion) require the use of the descriptors: “Mild,” “Moderate” or “Severe.”

Process

Step One: Discuss and agree on the needs

Step Two: Discuss and agree on the criteria for prioritizing the needs

Step Three: Rate the need by placing a number in the field beside each one based on the criteria in that column. The spreadsheet will automatically tally the score.

Step Four: Place an “X” in the final column if you anticipate a “green” co-benefit associated with this need/anticipated strategy.

Step Five: Facilitator (Danielle) will ask each person to report their final scores from each need and will tally and reveal the scores.

Step Six: Use the scores to guide the discussion to identify two to three priorities to be addressed this round (2016 – 2018).

Step Seven: Identify existing or new community partners that you anticipate engaging to assist with the work.
