Elective Options

Allergy and Immunology	Neurology
Anesthesia	Ophthalmology
Board Review	Orthopedics
Cardiology	Otolaryngology
Dermatology	Pain Management
Endocrinology	Palliative Medicine
Gastroenterology	Psychiatry
Geriatrics	Pulmonology
Hematology/Oncology	Research
Infectious Disease	Rheumatology
Nephrology	Women's Health

Electives outside of this list may be taken with GME and PD approval. **All elective rotations must be pre-approved by the rotation's preceptor as well as the Internal Medicine Residency Director.**

**All Residents must have successfully completed COMLEX Part III, have obtained a state medical license and DEA number, and have completed the first draft of their scholarly activity in order to be advanced to PGY-3

Residents must review rotation specific curriculum on MyEvaluations prior to the start of each rotation. This curriculum must be "confirmed" to document that the resident has reviewed the appropriate material.

In addition to scheduled rotations, residents will be required to complete a continuity care experience at one of the General Internal Medicine outpatient clinics. All residents will participate in a minimum of one half-day clinic per week on all blocks except ICU, Internal Medicine Night block and CCU. Residents are expected to build a panel of patients to follow throughout their training. The emphasis on development of the panel should occur during the first two years of residency.
