Adding University Hospitals as a Connection to an Existing FollowMyHealth Account from an email invitation on an Android device

To add University Hospitals to an existing FollowMyHealth account from Android, follow these steps. These instructions assume that you have already downloaded the FollowMyHealth app to your Android device. If you need assistance downloading the app, visit UHhospitals.org/FMHMobileApp for instructions.

1. Log into your email account and locate the email from noreply@followmyhealth.com. Tap on the email to open it.

2. After reading the information contained in the email, tap the blue “here” link.
3. Tap **Already a FollowMyHealth user? Sign in and add this connection**.

4. Tap **Sign In** if you have a FollowMyHealth username and password or, if you sign in with Facebook, Google, Yahoo, Microsoft or Cerner to log into your account, tap the button for that application.
5. Review the Welcome information and tap **Next**.

6. Enter your **Invite Code**, which is your 4 digit year of birth (example: 1956).
   Tap **Next**.
7. Review the Request for Access.
   Tap I Accept.

8. A screen will appear while your information uploads to your MyUHCare Personal Health Record. This may take a few minutes.
9. Tap the **heart icon** to launch the FollowMyHealth app.

FMH mobile will log you into the FMH Mobile app automatically.

If you have not yet downloaded the app, tap the **Google Play** button. Instructions are available to download the app at [UHhospitals.org/FMHMobileApp](http://UHhospitals.org/FMHMobileApp).

10. Your **Home** screen appears.

Congratulations! You have successfully added University Hospitals as a connection to your existing FollowMyHealth account.

For complete instructions on how to use the app, visit [UHhospitals.org/FMHMobileApp](http://UHhospitals.org/FMHMobileApp).
